

# Artificial Intelligence and the Future of Medicine/Mankind

Howard Schneider  
Sheppard Clinic North, Toronto, Canada

OMA Section on Primary Care Mental Health  
Toronto, March 21 2020

# CONFLICTS OF INTEREST

- ▶ None

# COMMERCIAL NAMES

- ▶ I will try to minimize use of commercial names, where feasible (but....many AI-related products are company specific)

DR HOWARD SCHNEIDER, MD, MDPAC(C), CCFP

# **WHY SHOULD I GIVE THIS TALK?**

## **Practicing physician**

- ▶ Background –General Practice/ Family Practice
- ▶ A decade –Psychiatry Consultations in ER (Laval)
- ▶ Two decades –Community Mental HealthCare(GTA)

4

DR HOWARD SCHNEIDER, MD, MDPAC(C), CCFP

## **WHY SHOULD I GIVE THIS TALK?**

**Interest – How does mind work?**

**Flip side – How to create an AGI?**

**(Artificial General Intelligence, ‘HLAI’, ‘Strong AI’)**

- ▶ Research – Cognitive Architectures
- ▶ (I design the innards of the machines to produce AI/AGI)

# LEARNING OBJECTIVES

- ▶ **1. Real understanding of what AI is:**
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ **2. How will AI in next decade (or two) affect my patients' lives?**
- ▶ **3. How will AI affect my practice of medicine including psychotherapy?**
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ **4. How will AI affect the future of mankind?**
- ▶ **5. Discussion**

WILL DO BEST TO KEEP ON SCHEDULE....

(90 MINUTES TALK, 30 MINUTES QUESTIONS)

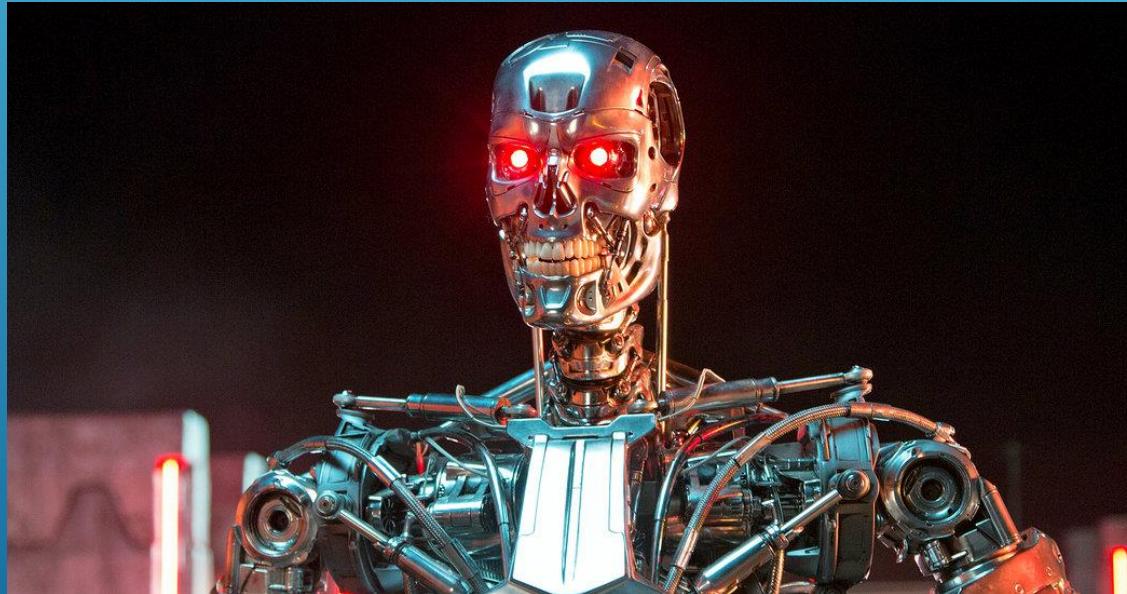

NOT REQUIRED.... BUT.....  
CONSIDER MAKING NOTES IF THIS HELPS  
YOU LEARN....

# LEARNING OBJECTIVES

- ▶ **1. Real understanding of what AI is:**
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ **2. How will AI in next decade (or two) affect my patients' lives?**
- ▶ **3. How will AI affect my practice of medicine including psychotherapy?**
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ **4. How will AI affect the future of mankind?**
- ▶ **5. Discussion**

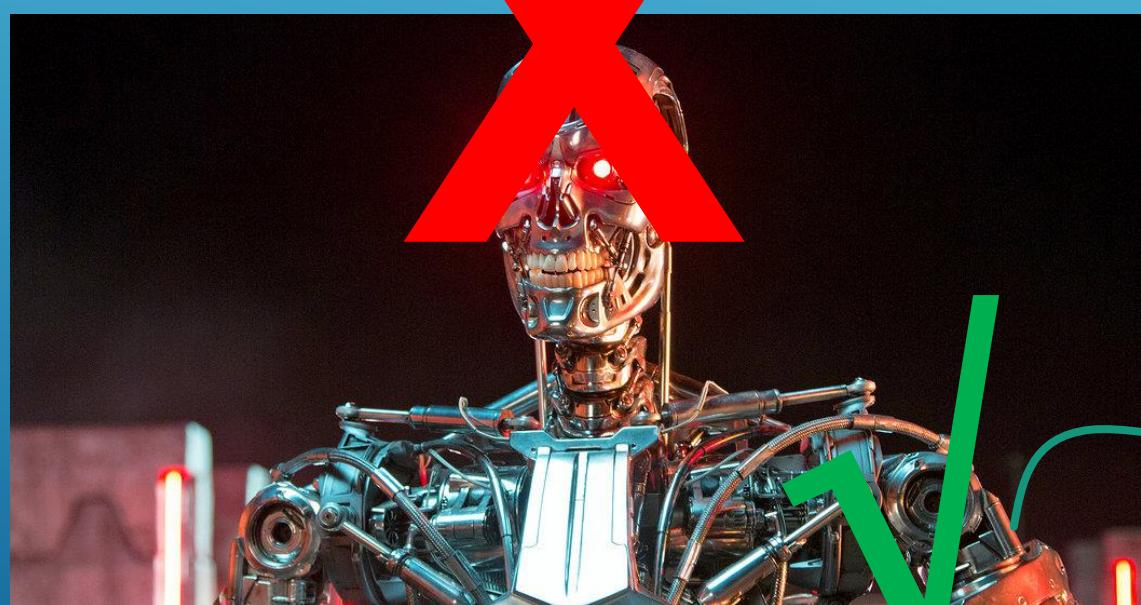

FORGET ABOUT CURRENT HYPE YOU SEE  
ABOUT AI (ARTIFICIAL INTELLIGENCE) ALL  
AROUND YOU IN THE MEDIA....

10

March 2020

FORGET ABOUT CURRENT HYPE YOU SEE  
ABOUT AI (ARTIFICIAL INTELLIGENCE) ALL  
AROUND YOU IN THE MEDIA....

WILL **NOT** HAPPEN WITH  
CURRENT TECHNOLOGY

Current technology: **AI** part  
**not** possible, but android-like  
walking (running, even  
jumping) **robots exist**

11

# AT PRESENT: FORGET ABOUT CURRENT HYPE YOU SEE IN MEDICINE ABOUT AI

Straightforward computer engineering can greatly improve EMRs (an almost magical AI would be nice to have.... but huge improvements are possible with normal computer engineering)

MANY IMPROVEMENTS IN EMR (FOR EXAMPLE)  
POSSIBLE WITH GOOD COMPUTER ENGINEERING  
PRACTICES (THE AI PART MAY BE MINUSCULE)

NOT  
REALLY AI

13

March 2020

# AT PRESENT: FORGET ABOUT CURRENT HYPE YOU SEE IN MEDICINE ABOUT AI

RUNNING HOSPITALS OR YOUR PRACTICE BY BIG DATA IS NOT TRUE MEDICINE – IT IS SIMPLY VERY POWERFUL STATISTICS – WE WILL COME BACK AND TALK ABOUT THIS LATER

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ **1a. Deep Learning and Reinforcement Learning**
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

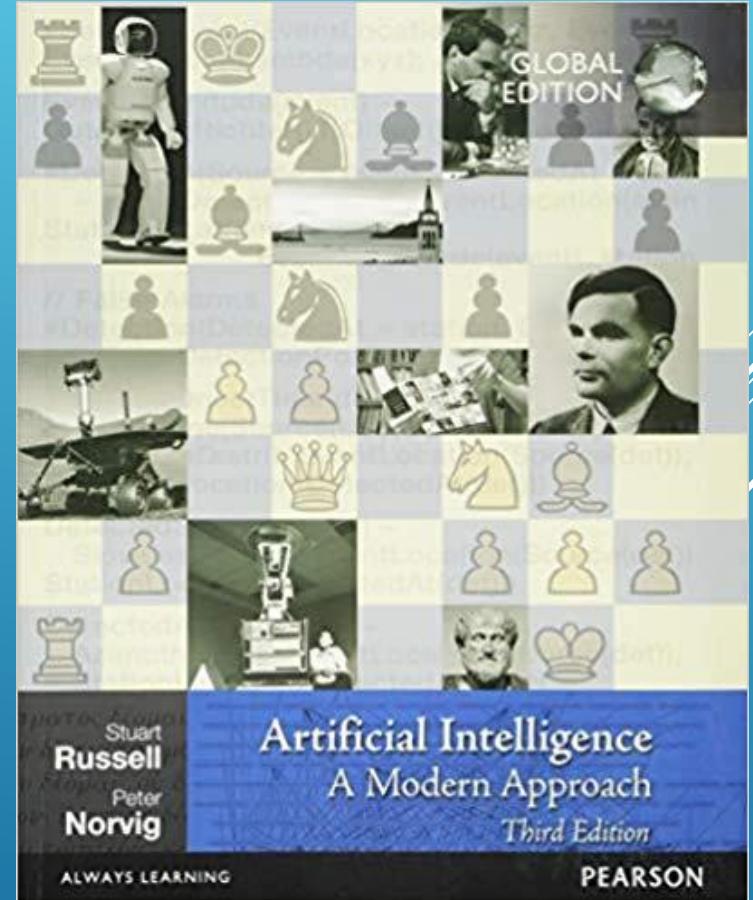

# THESE DAYS, PEOPLE USE THE TERM “AI” TO REFER TO **DEEP LEARNING**

Of course, AI is much more than  
‘Deep Learning’ – we’ll talk about  
that later.

# “Of course, AI is much more than ‘Deep Learning’ – we’ll talk about that later.”

Deep Learning actually only tiny part of AI  
AI a huge field – even an introduction to the subject  
is massive

1. Definition of AI
2. History of AI
3. Mathematical Primer
4. Computer Science Theoretical Concepts
5. Computational Devices
6. Programming Languages
7. .... .... ....

# DEEP LEARNING.... LET'S JUST JUMP IN....

18

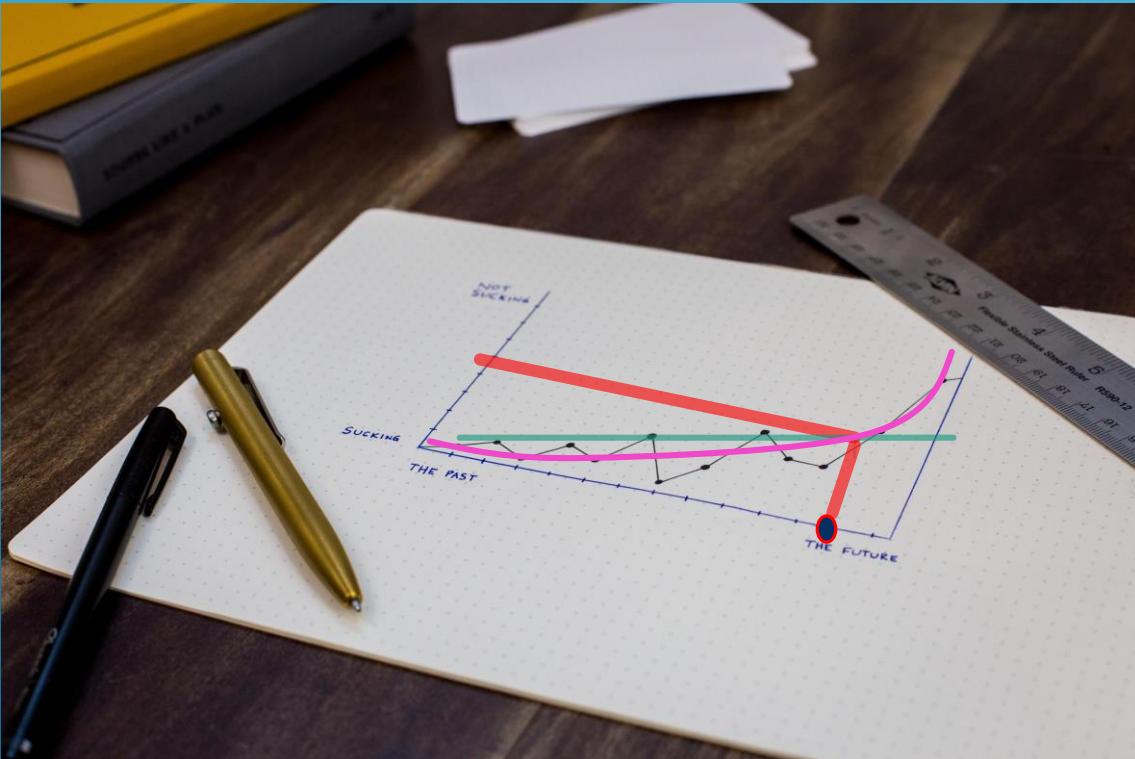

March 2020

# OK.... WHAT IS DEEP LEARNING?

19

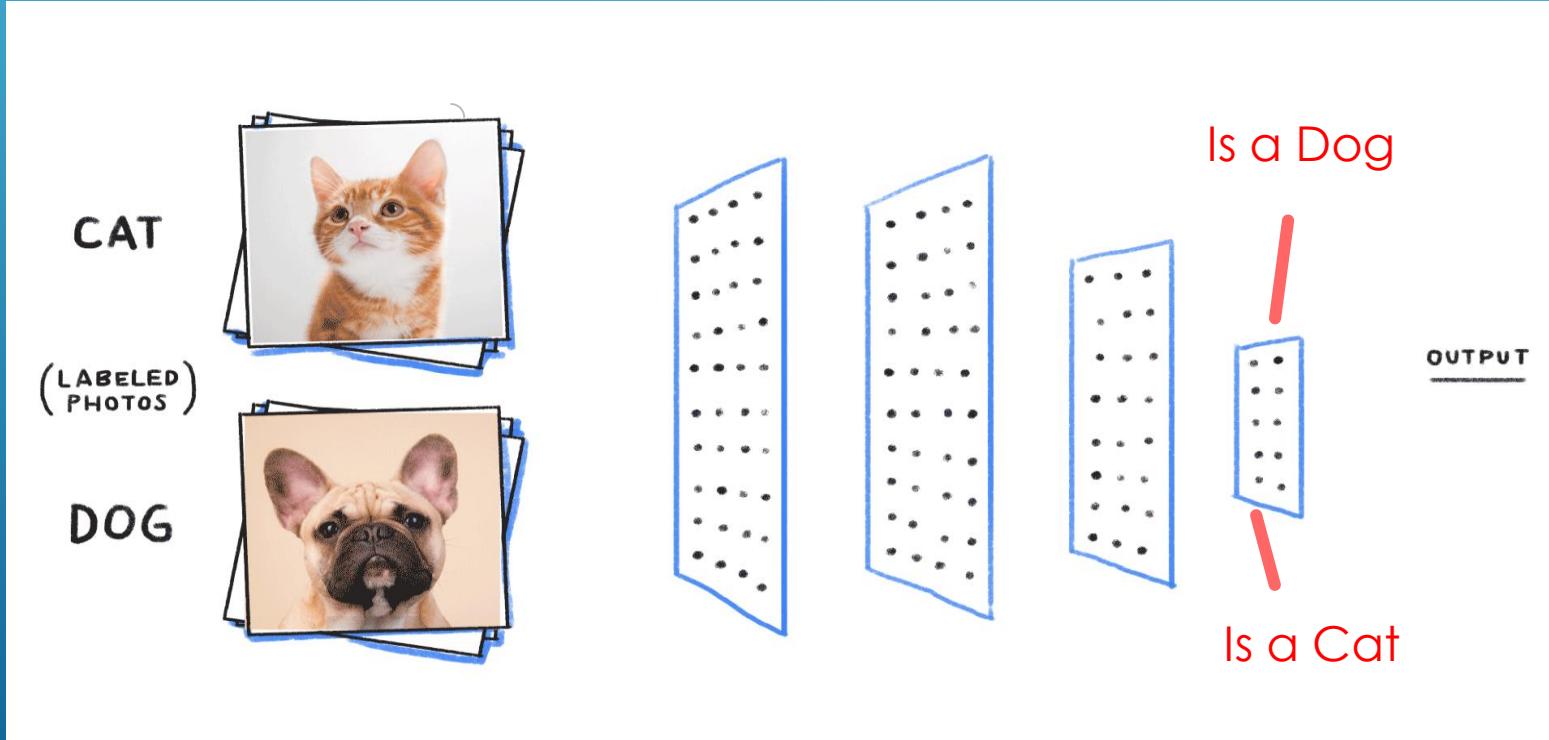

March 2020

# THIS IS YOU – EG, PREMED CHEMISTRY – DOING SIMPLE “ARTIFICIAL INTELLIGENCE”, IE, DEEP LEARNING

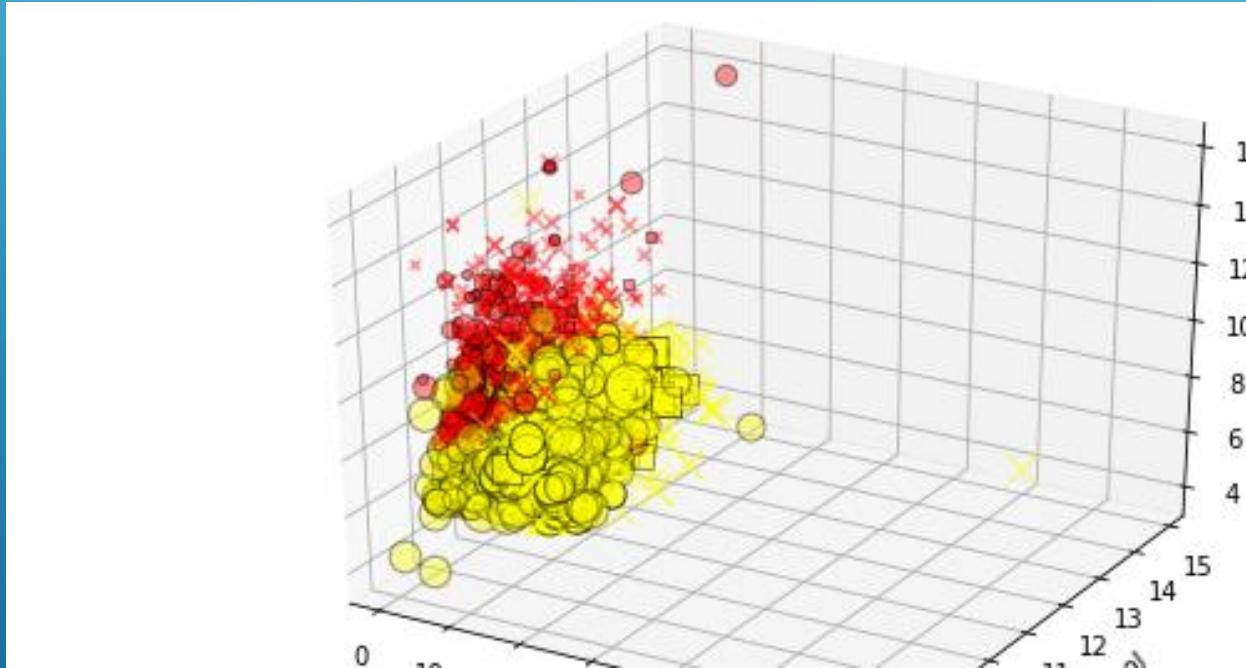

New X value never seen  
before, you can predict  
the Y value

NOW MAKE A GRAPH SO IF SEE A NEW ANIMAL (JAW SHAPE, NOSE SHAPE, ETC) JUST LIKE NEW X VALUE, YOU CAN PREDICT THE Y VALUE – IS IT A DOG OR A CAT??

- CONSIDER DIFFERENT FEATURES OF DIFFERENT DOGS AND CATS
- PLOT THEM
- BELOW IS 3-D BUT MAYBE REALLY NEED 1000-D (OR 64,000 DIMENSIONS!!)

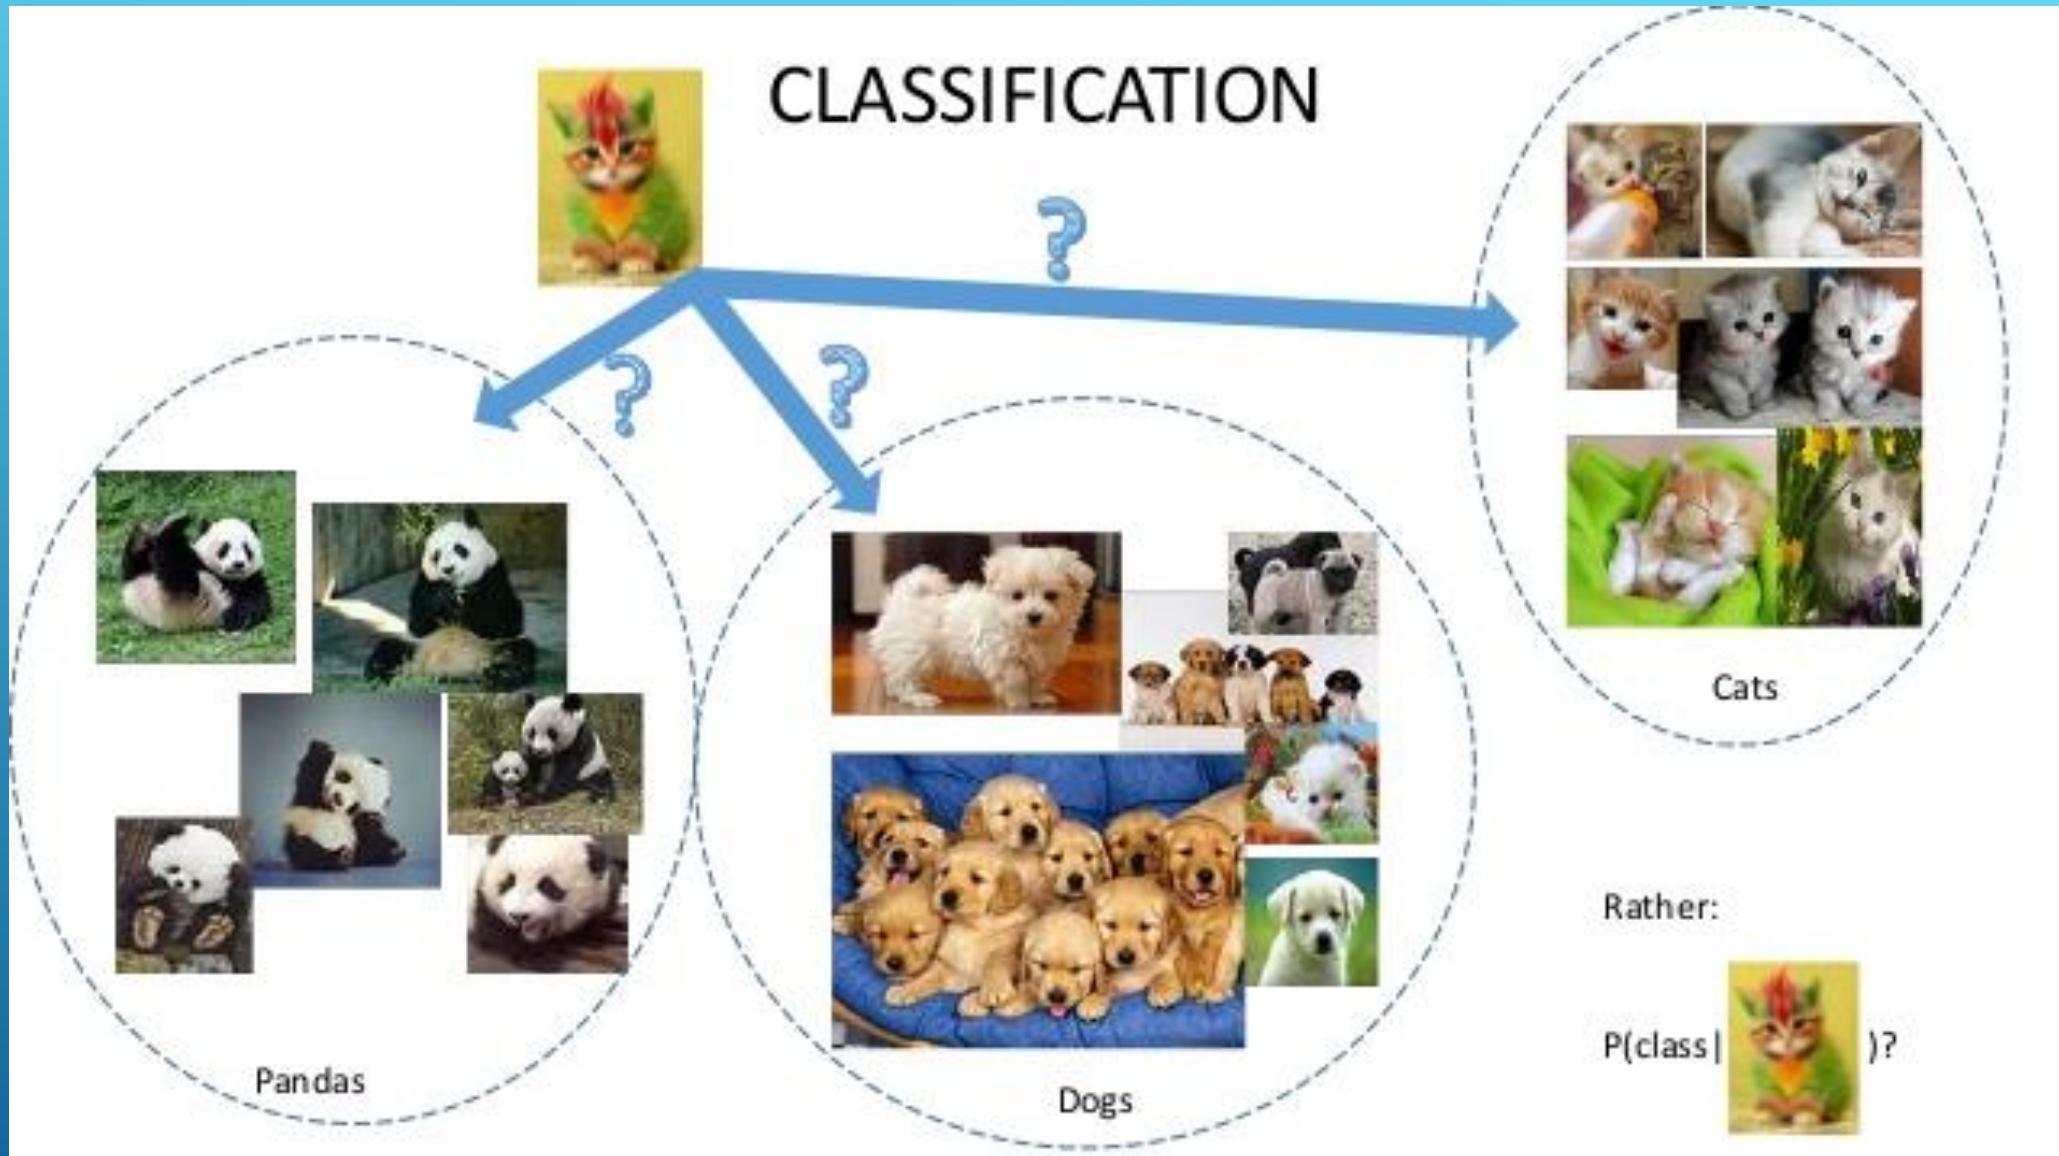

22

- CONSIDER DIFFERENT FEATURES OF DIFFERENT DOGS AND CATS
- PLOT THEM
- BELOW IS 3-D BUT MAYBE REALLY USE 1000-D

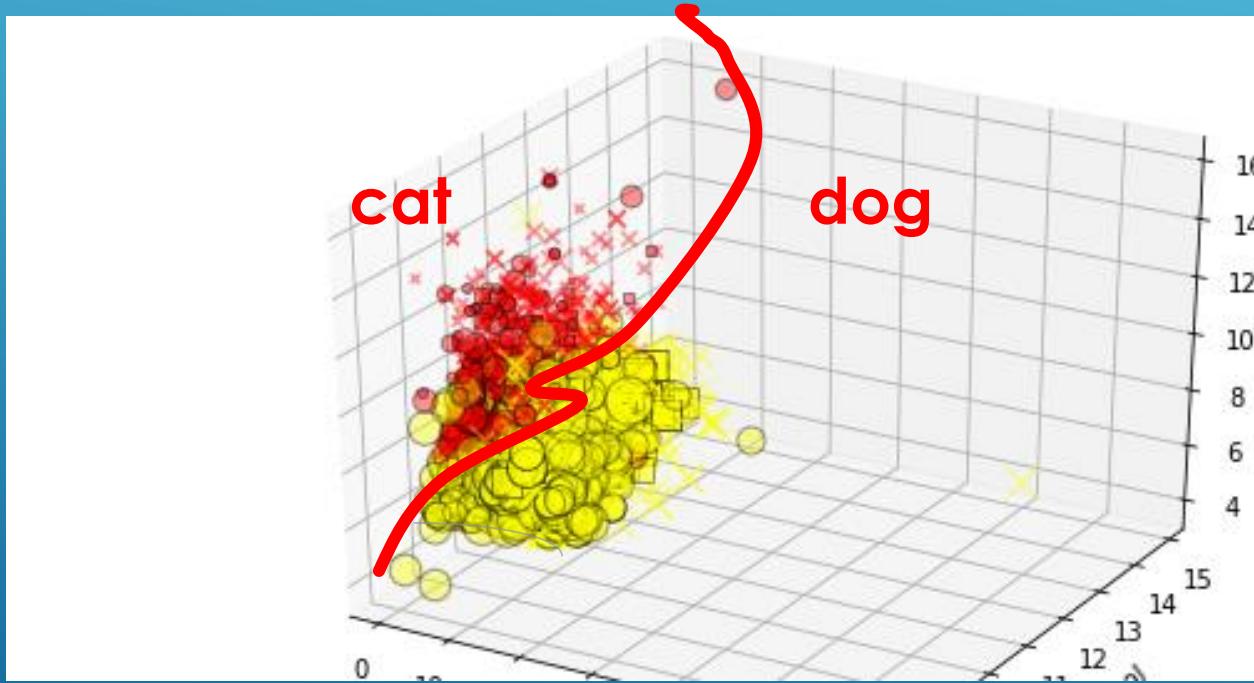

23

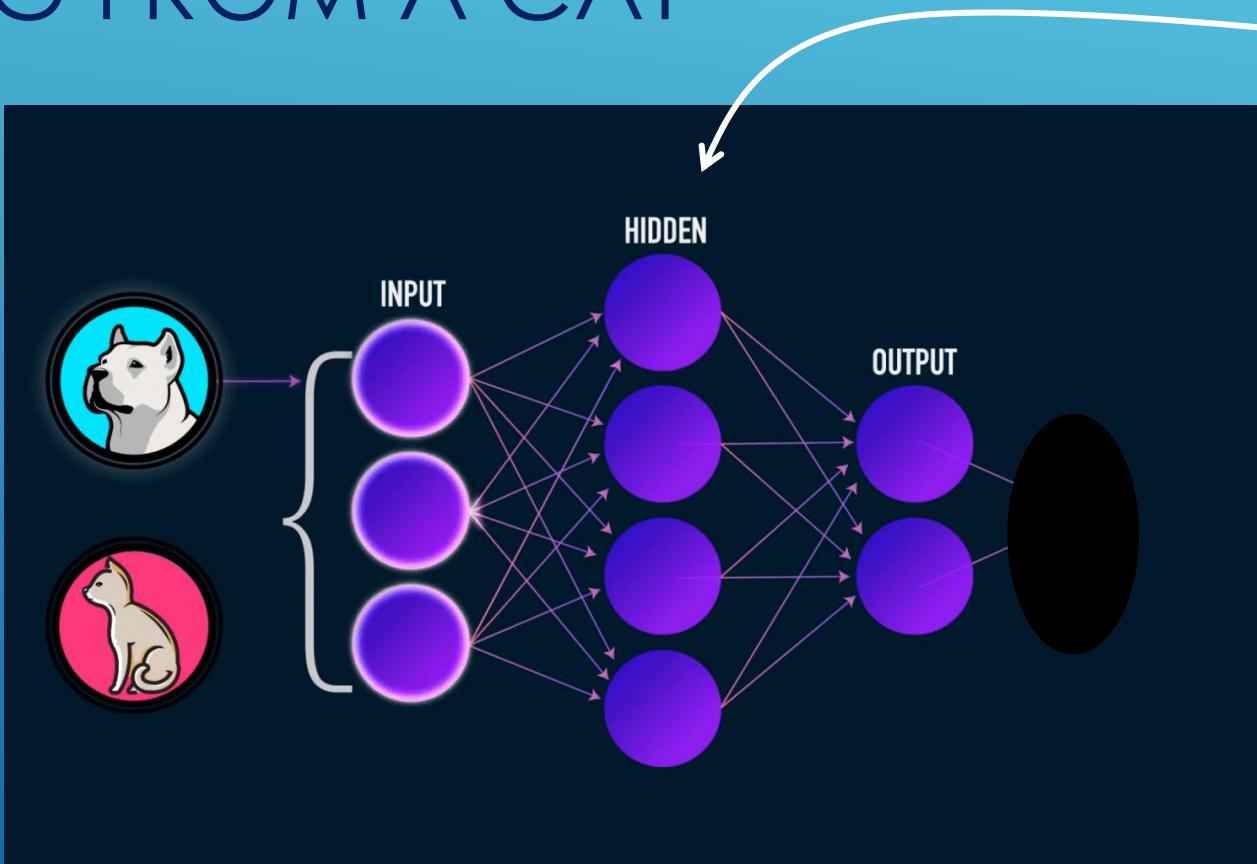

# CLASSIFICATION

OK....HOW DO WE AUTOMATICALLY  
BUILD SUCH A 3-D OR 1000-DIMENSION  
GRAPH?

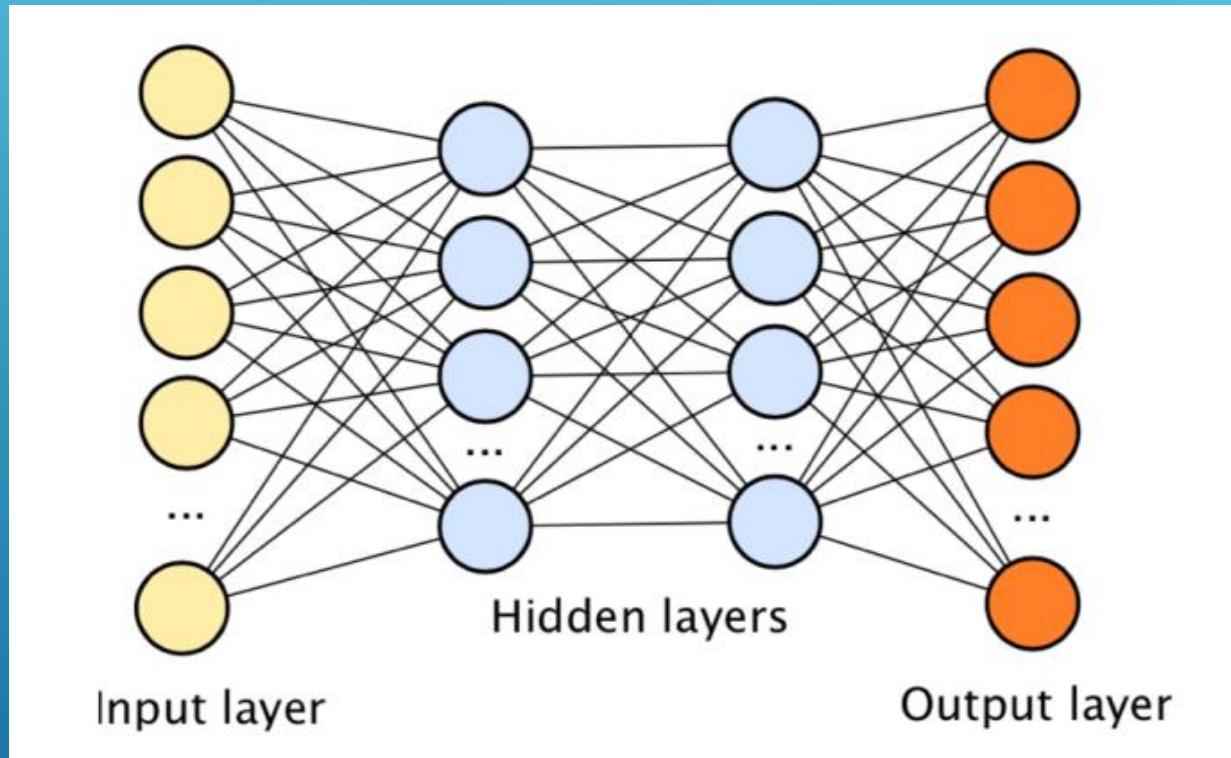

# NEURAL NETWORK TO 'AUTOMATICALLY' LEARN TO TELL A DOG FROM A CAT

**Simplified**  
Real Deep Learning  
Neural Network will  
have *\*many\** hidden  
layers

*Deep Learning Neural Network will have  
\*many\* hidden layers*

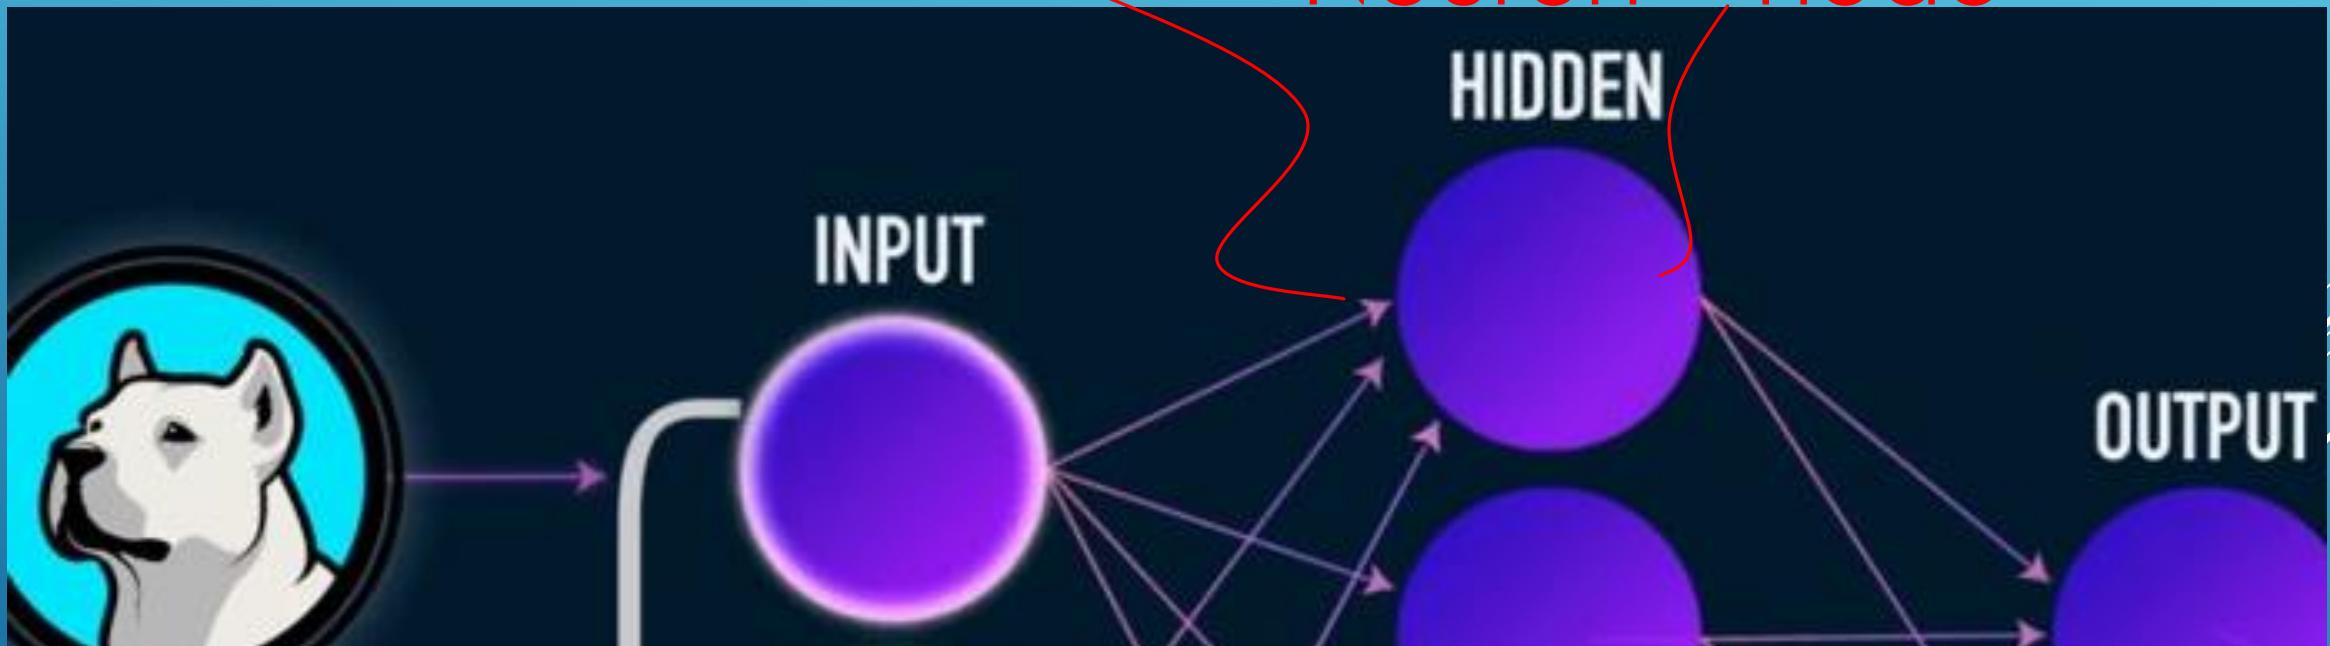

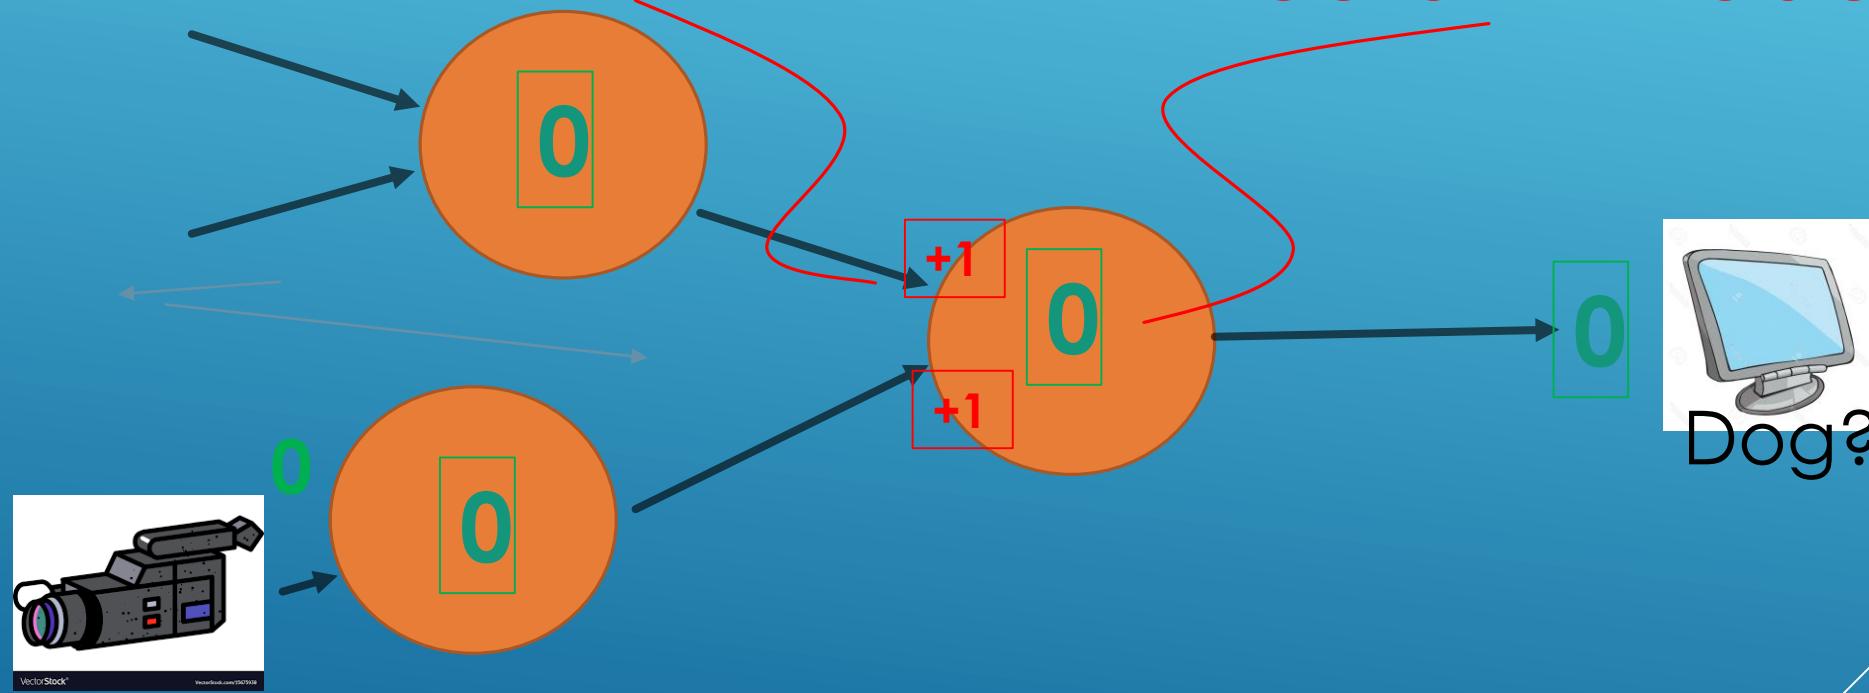

# *Simple, Realistic* Deep Learning Neural Network will have *\*many\** hidden layers

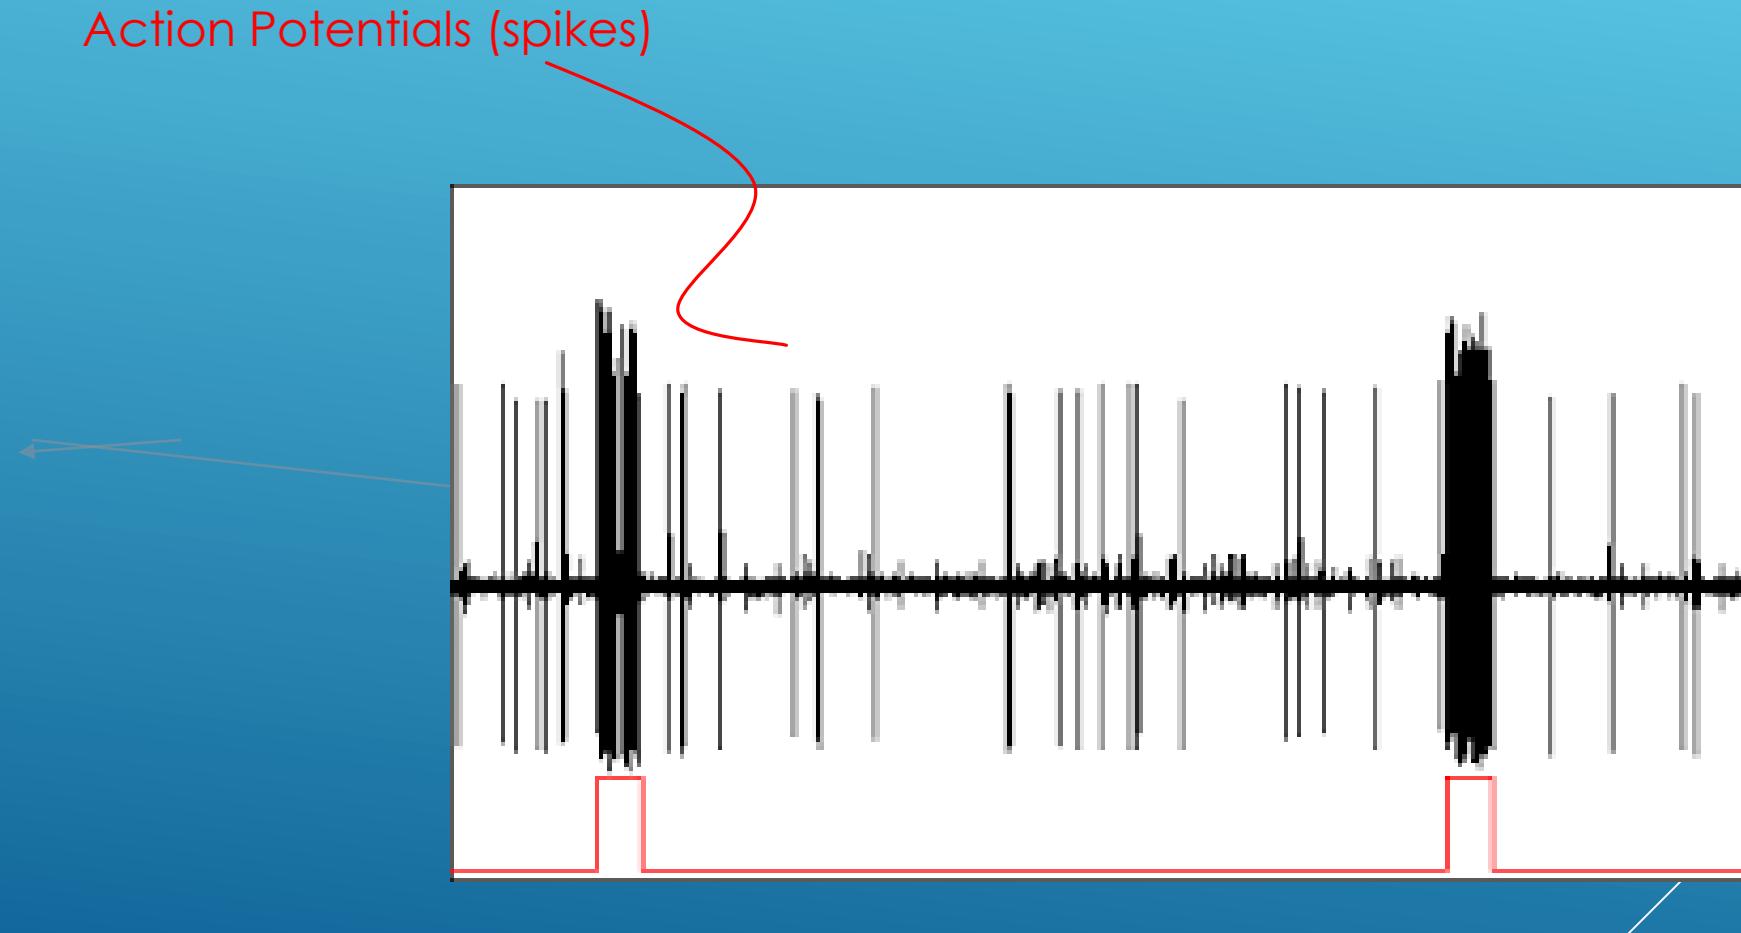

Synapse = weight

Neuron = node

# Real Neural Networks

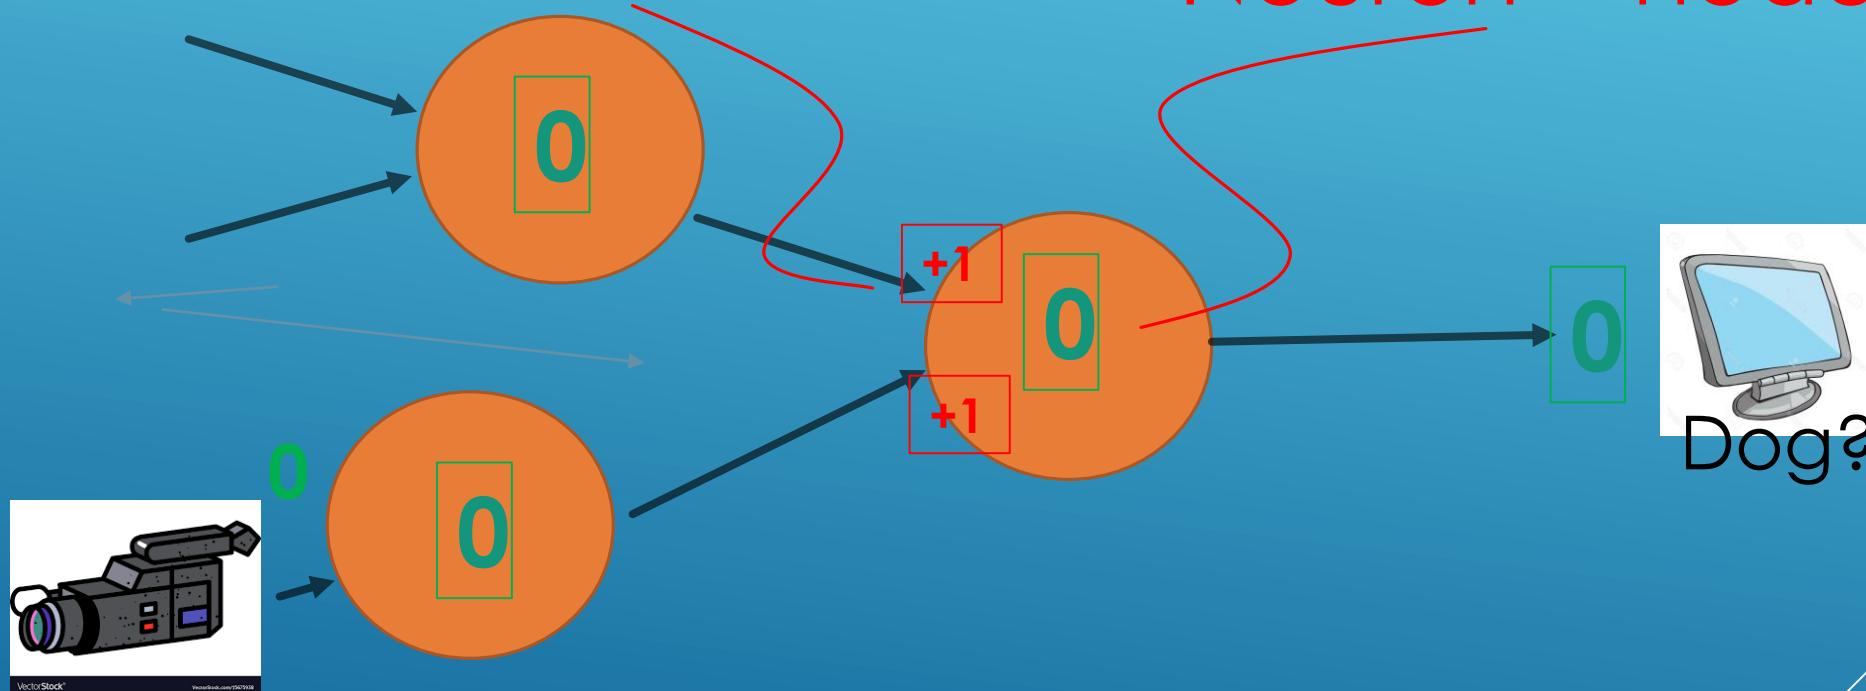

31

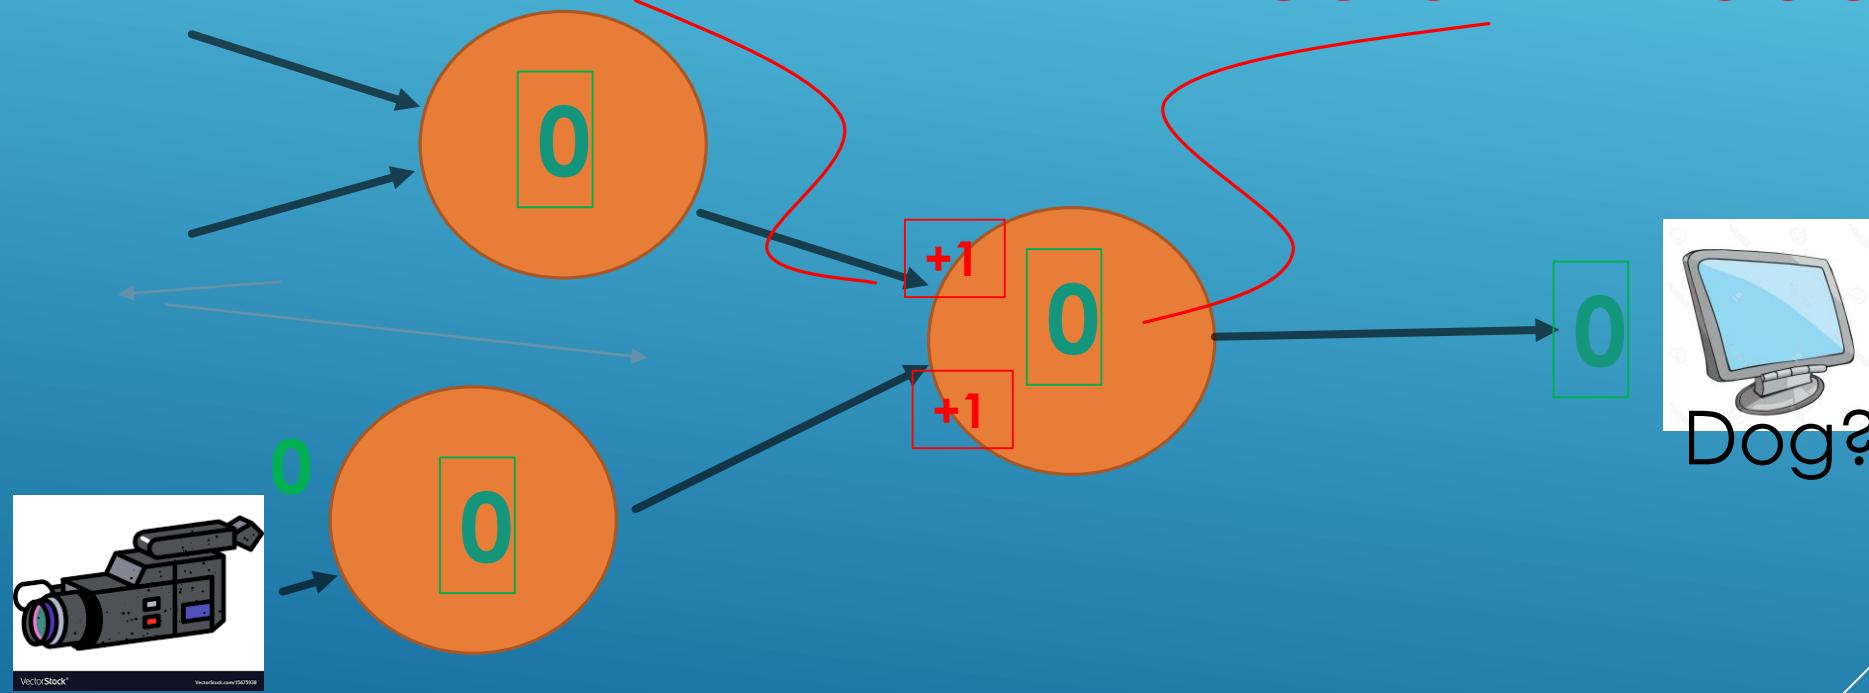

March 2020

# “Artificial Neural Network” (ANN)

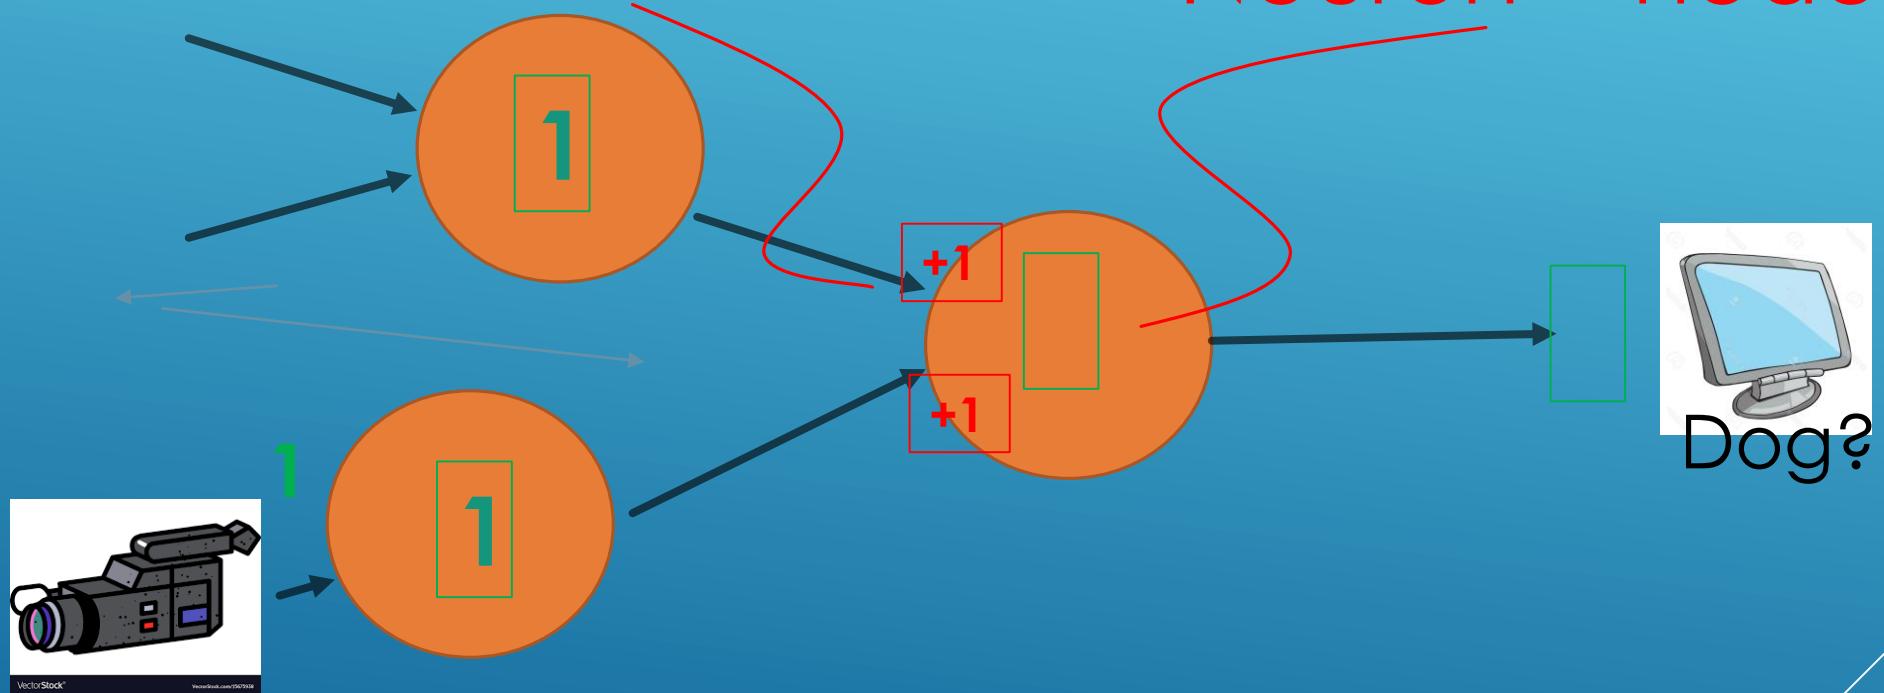

Synapse = weight

Neuron = node

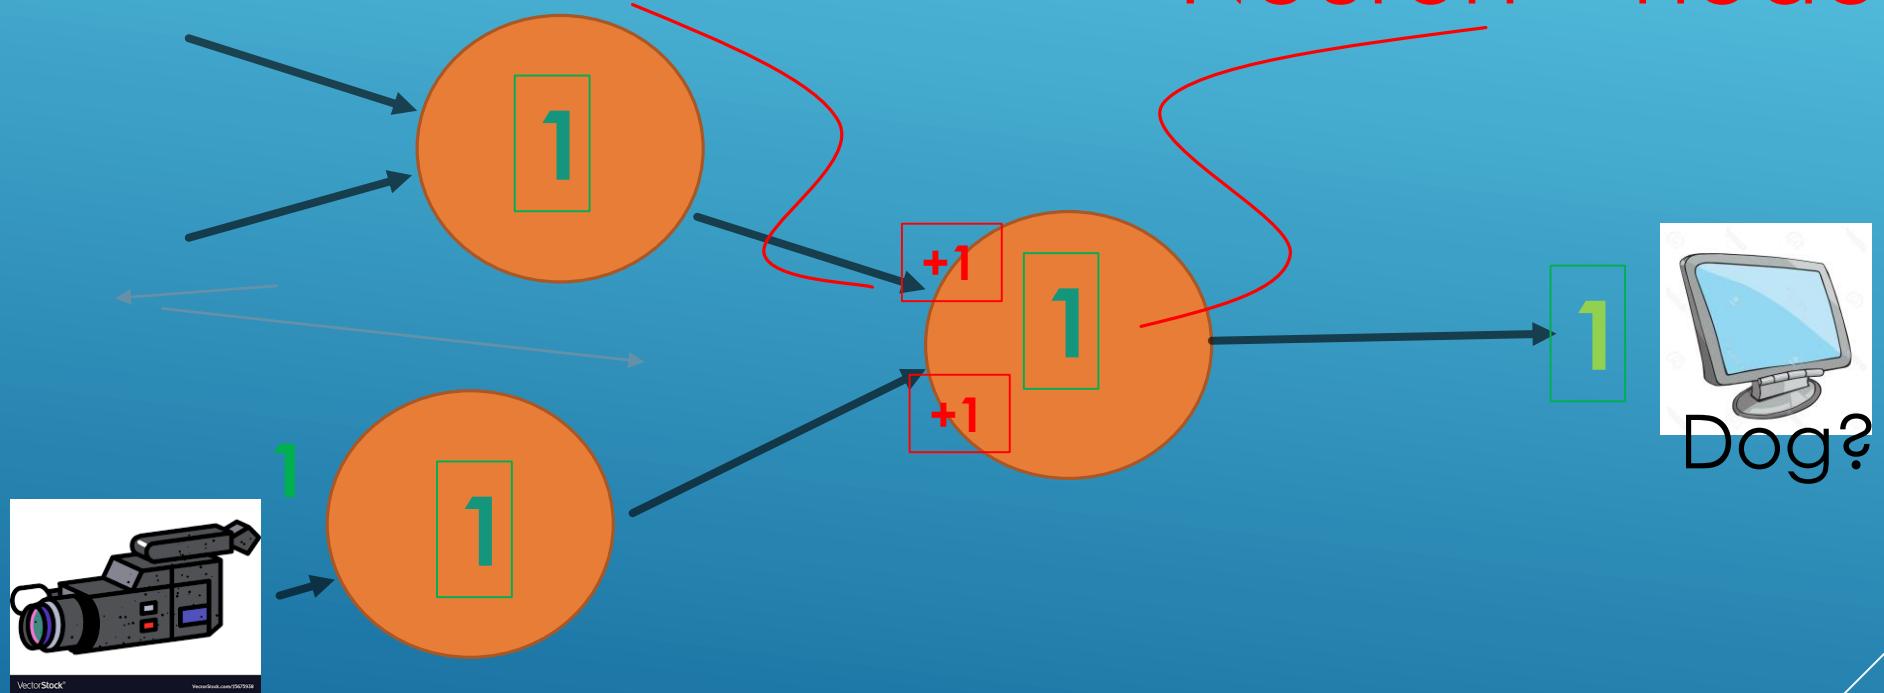

Synapse = weight

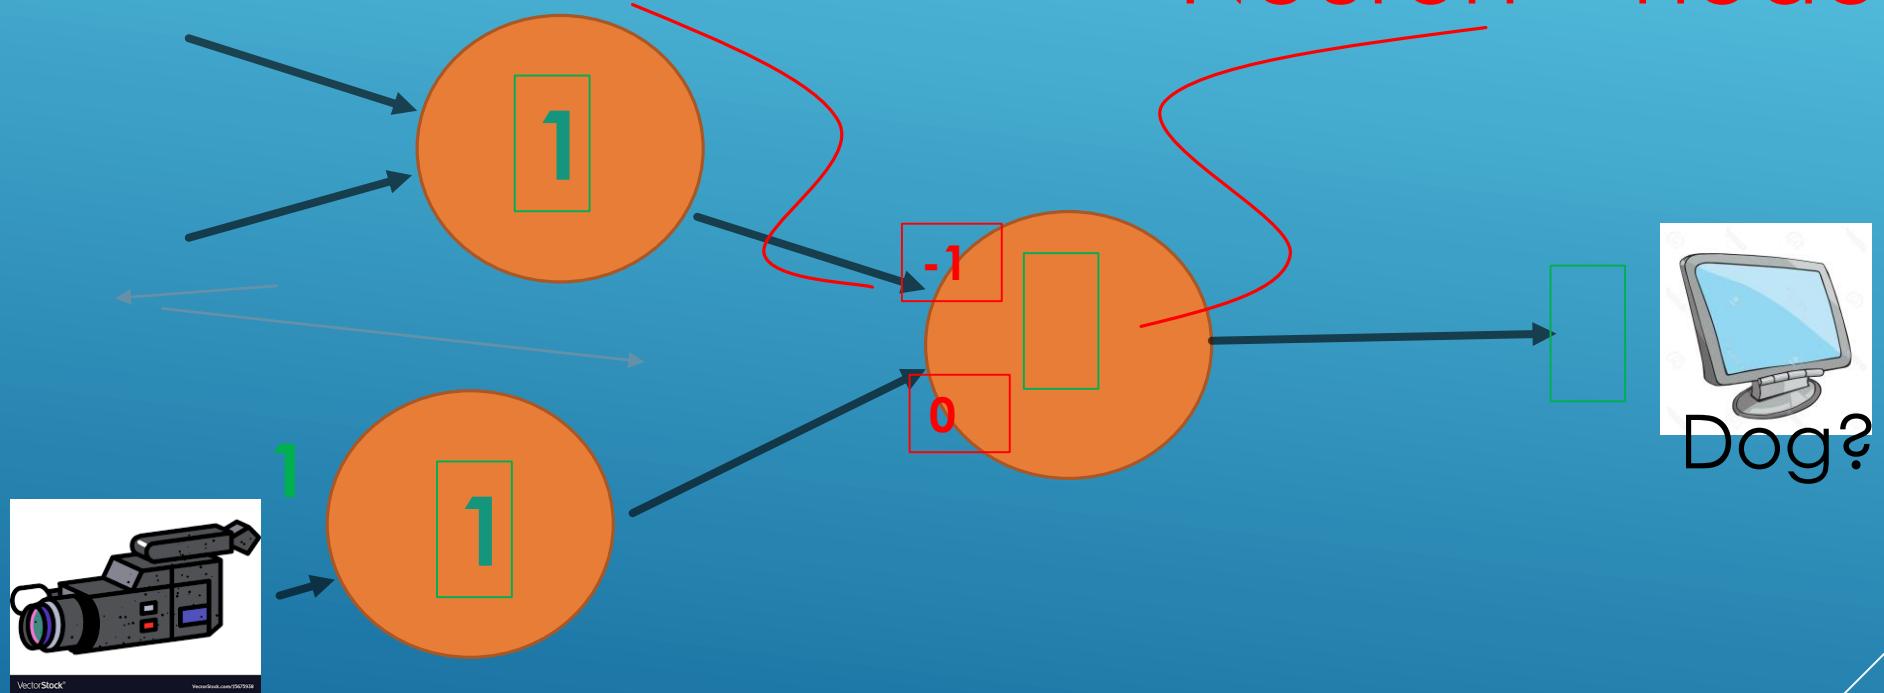

Neuron = node

Synapse = weight

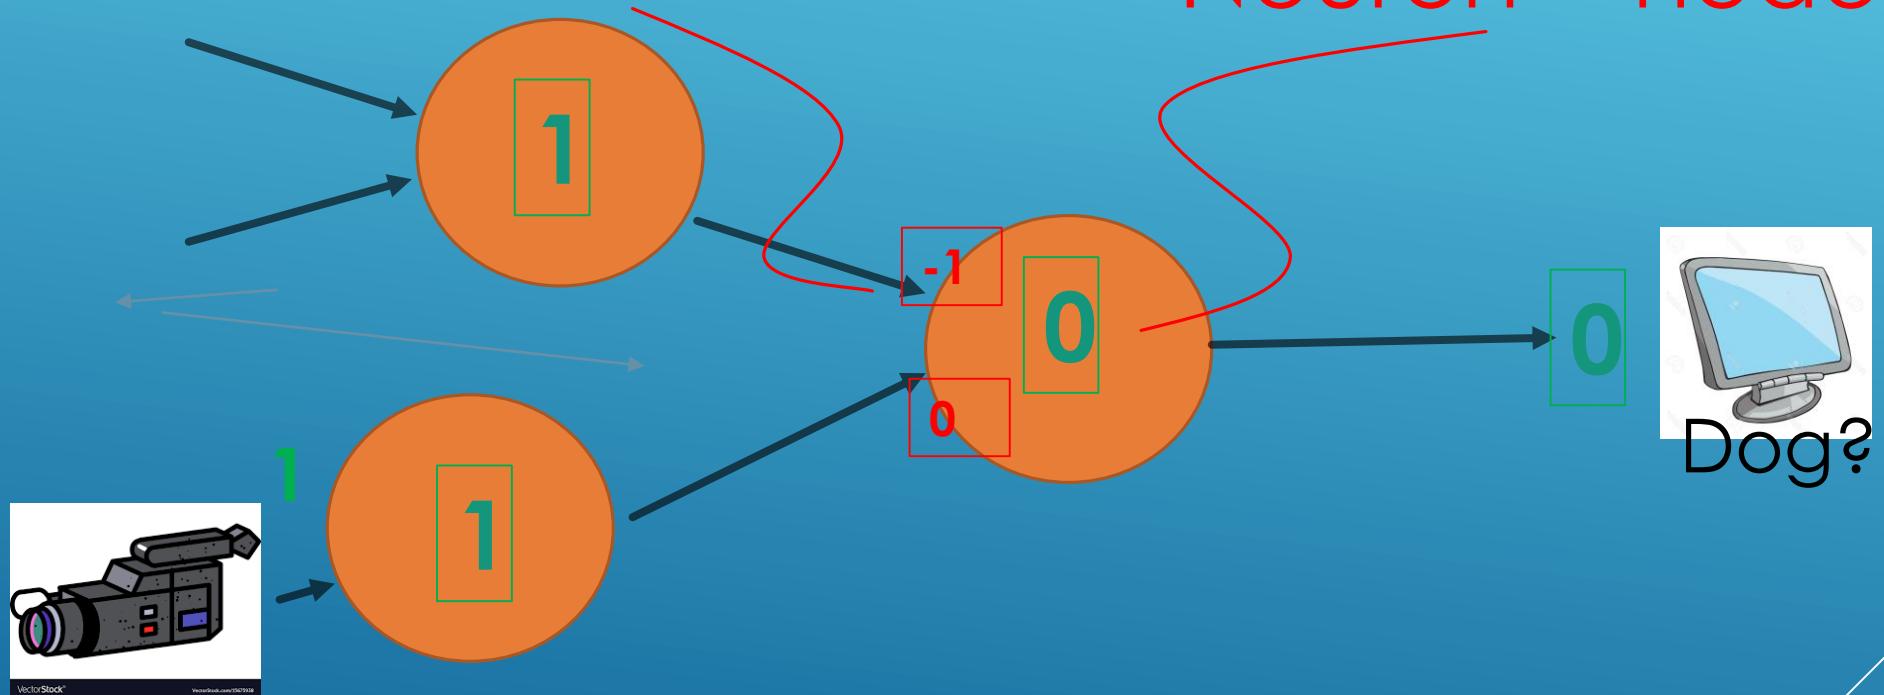

Neuron = node

Synapse = weight

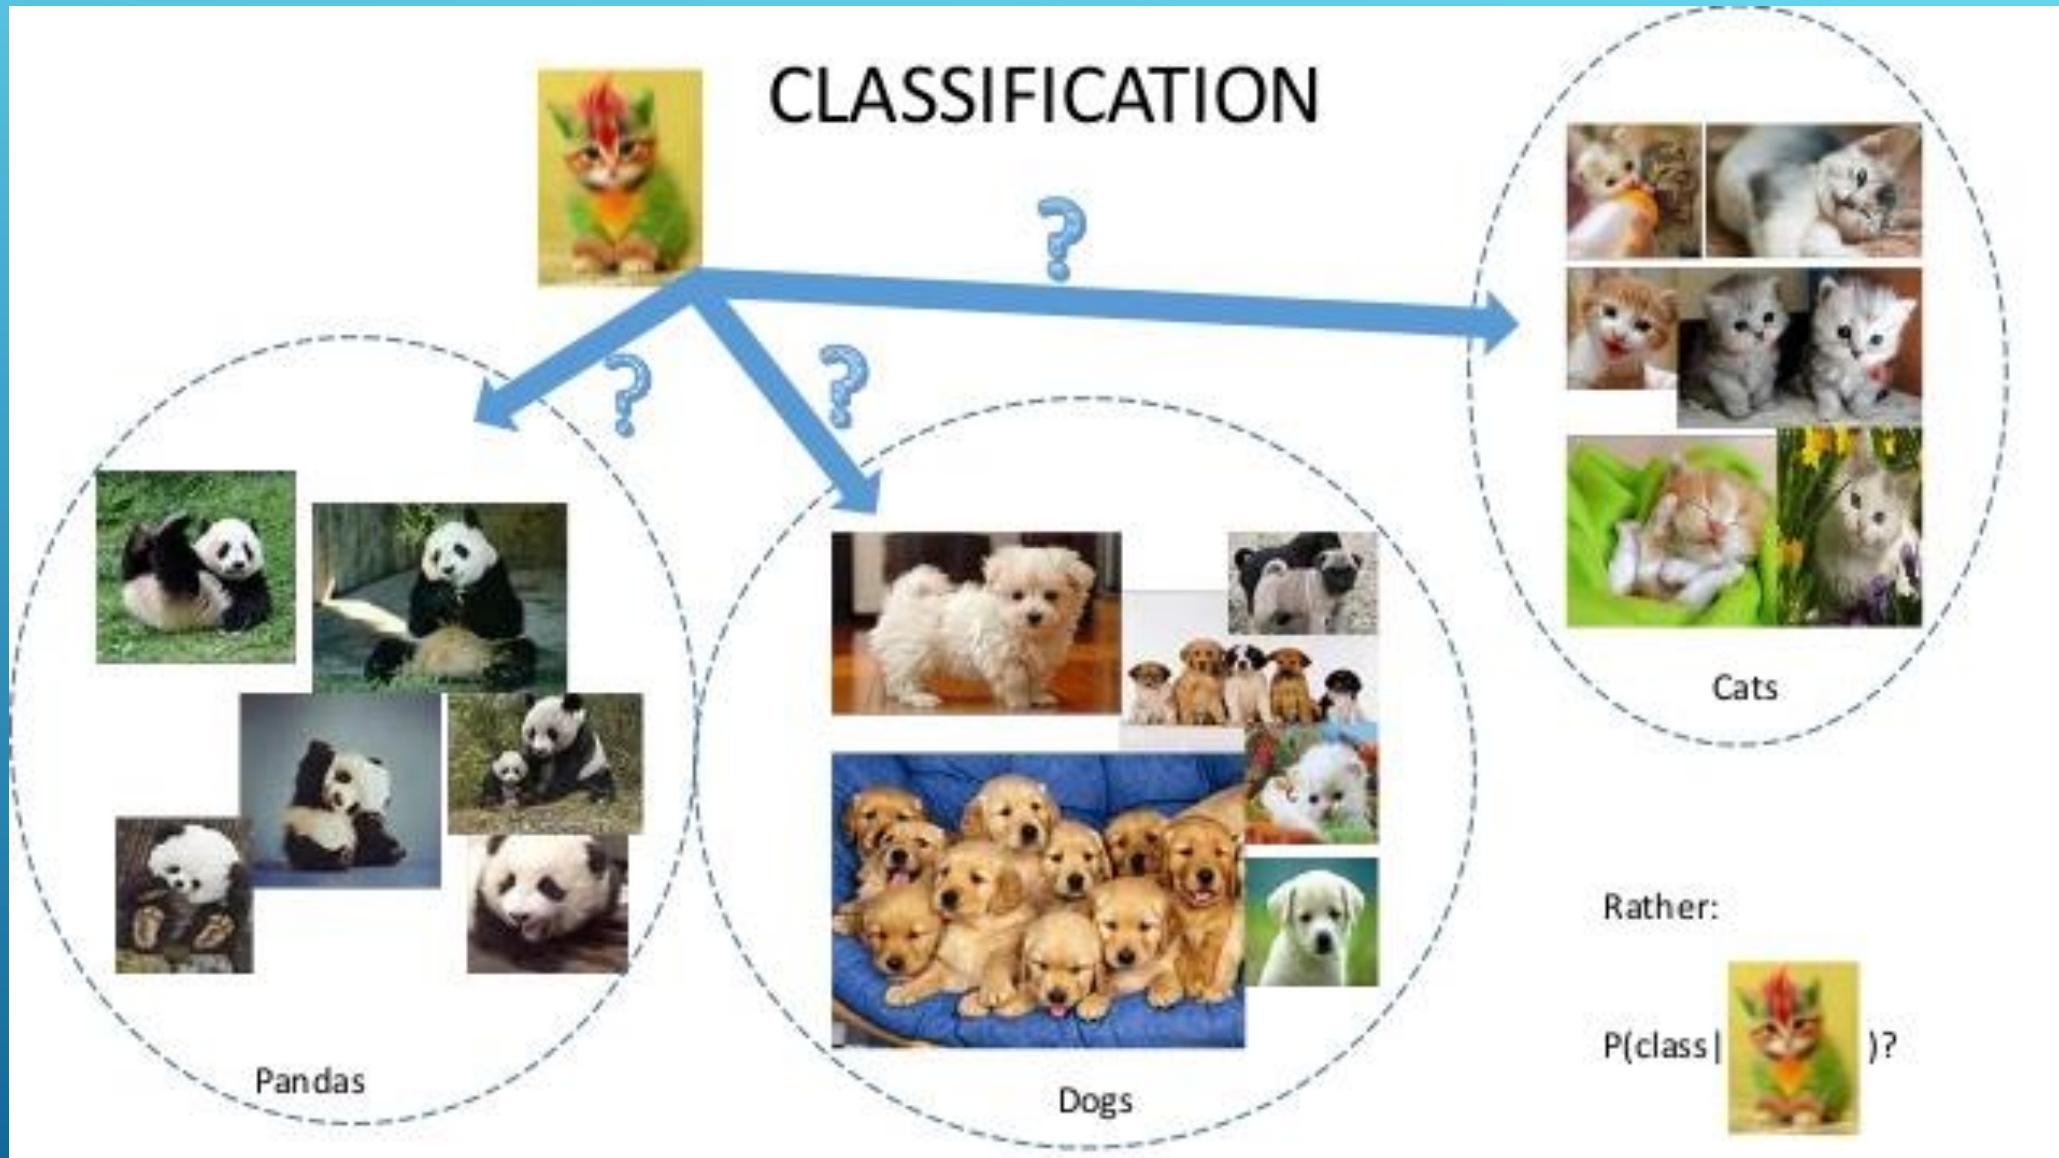

Synapse = weight

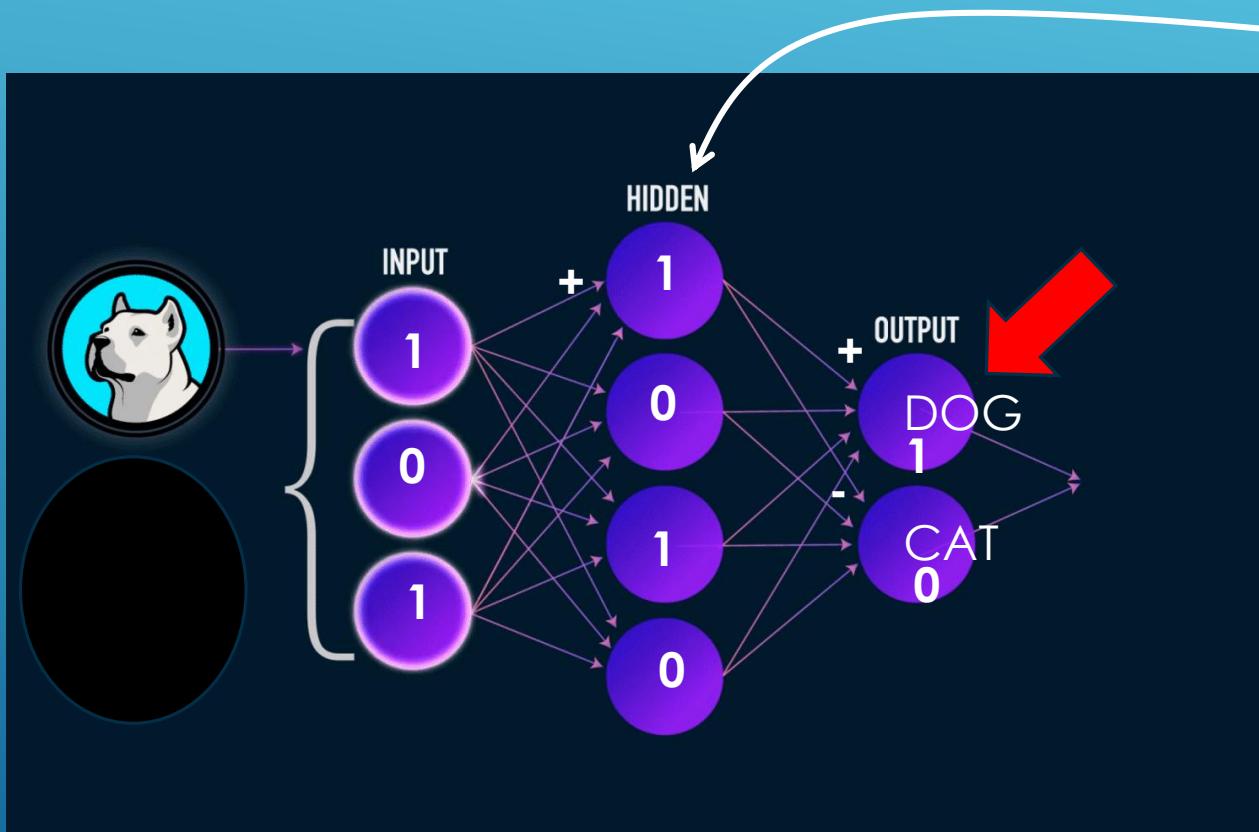

Neuron = node

# CLASSIFICATION

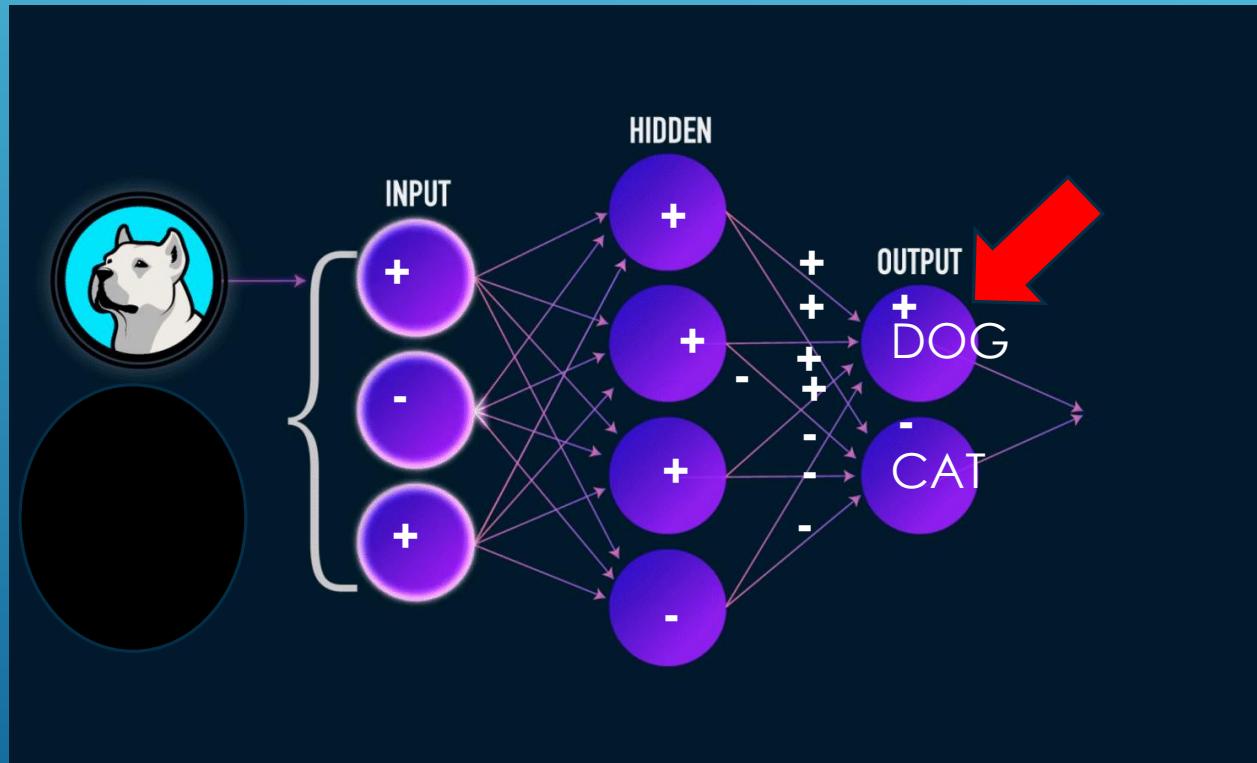

“ANN” == ARTIFICIAL NEURAL NETWORK  
("DEEP LEARNING") == LOTS OF HIDDEN LAYERS)

**Simplified**  
Real Deep  
Learning Neural  
Network will  
have *\*many\**  
hidden layers

FOR THE PIXEL INPUTS OF THE DOG, STRONGER SYNAPSES GOING TO THE NEURONS FROM INPUT TO HIDDEN TO “DOG” OUTPUT

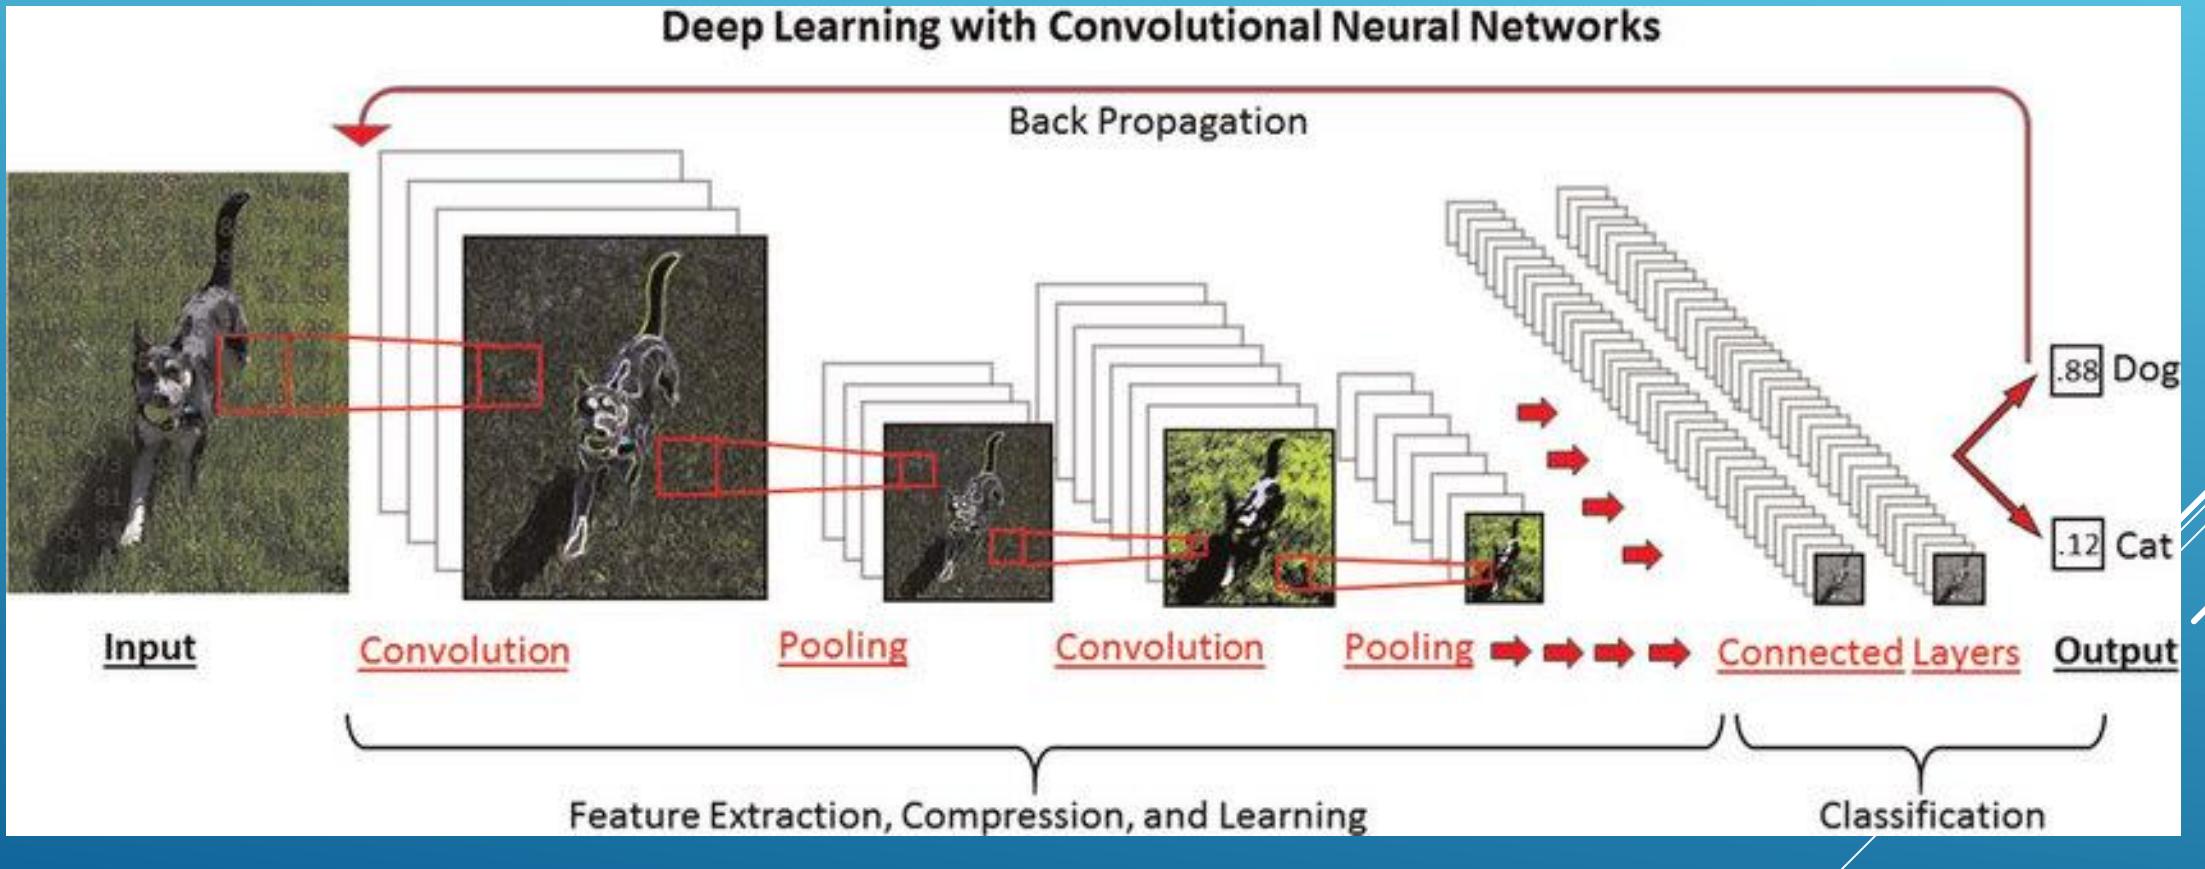

# HOW DID THE NEURAL NETWORK (“DEEP LEARNING NETWORK” IF MORE LAYERS) GET WIRED UP LIKE THIS TO GIVE US THIS ANSWER?

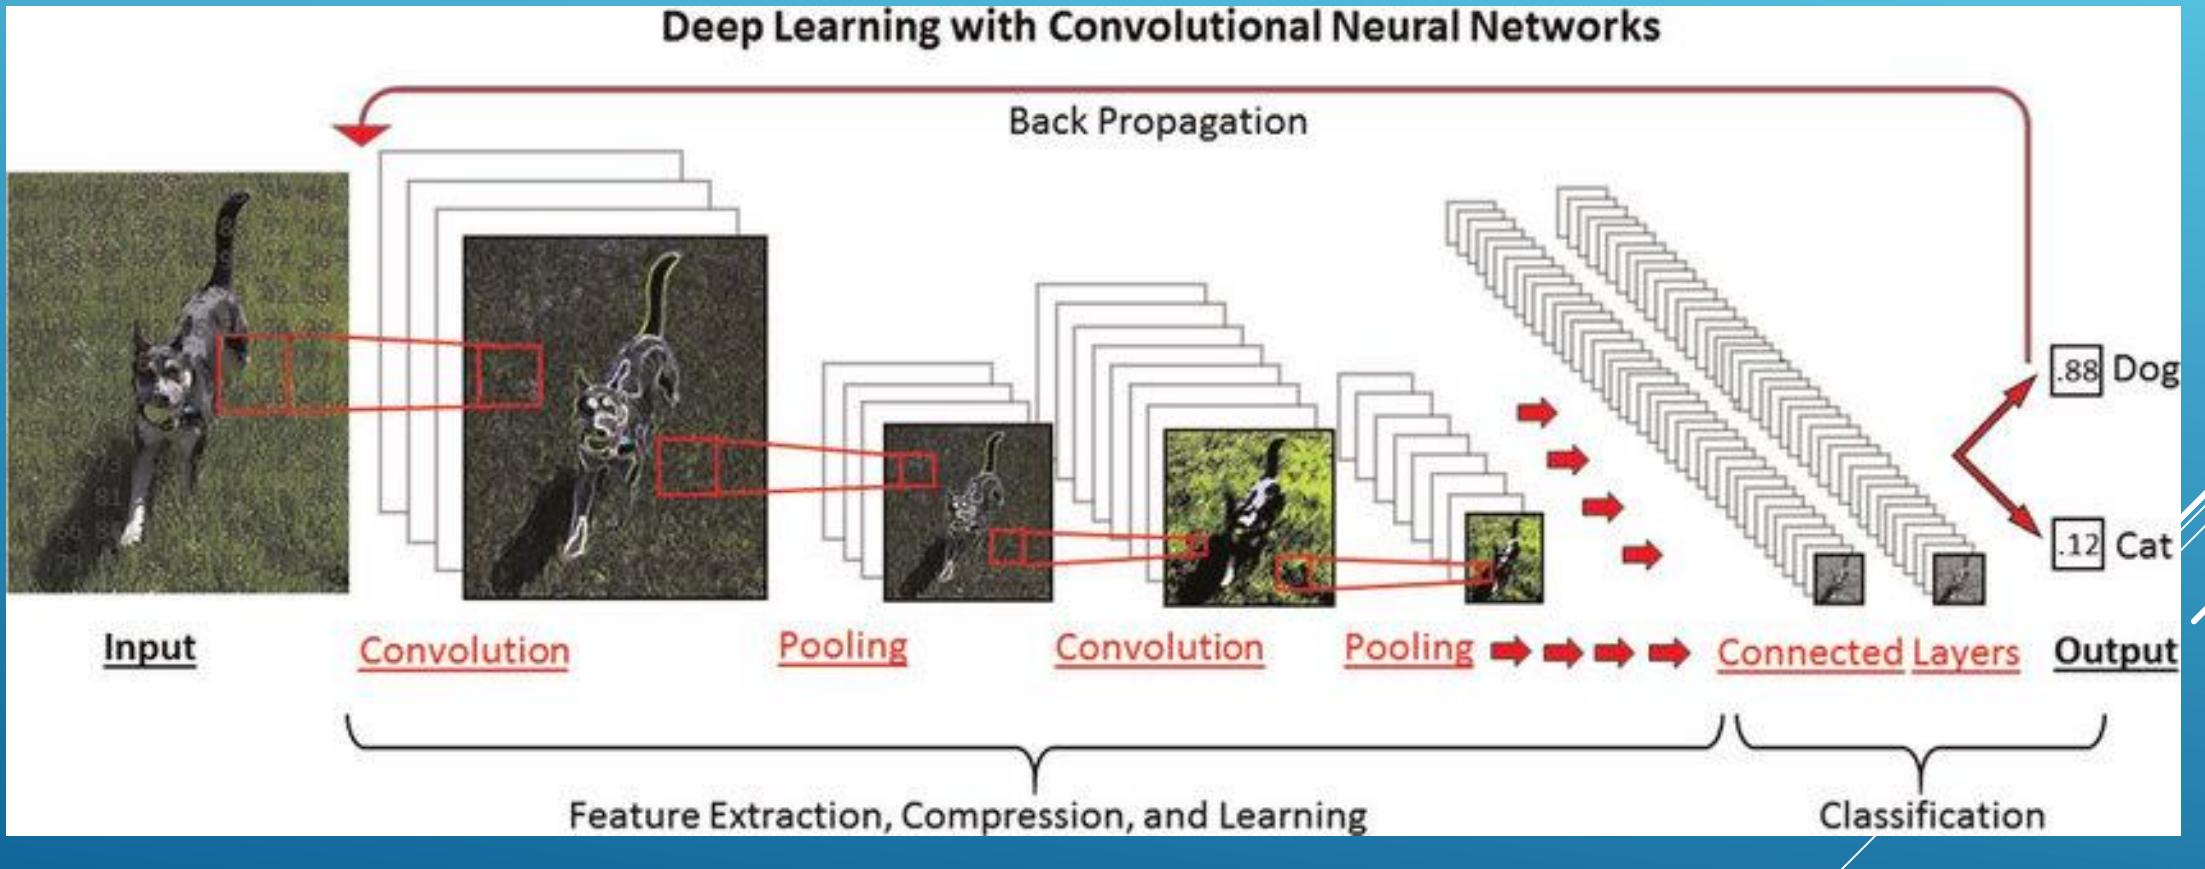

# REALLY LOOKS MORE LIKE THIS

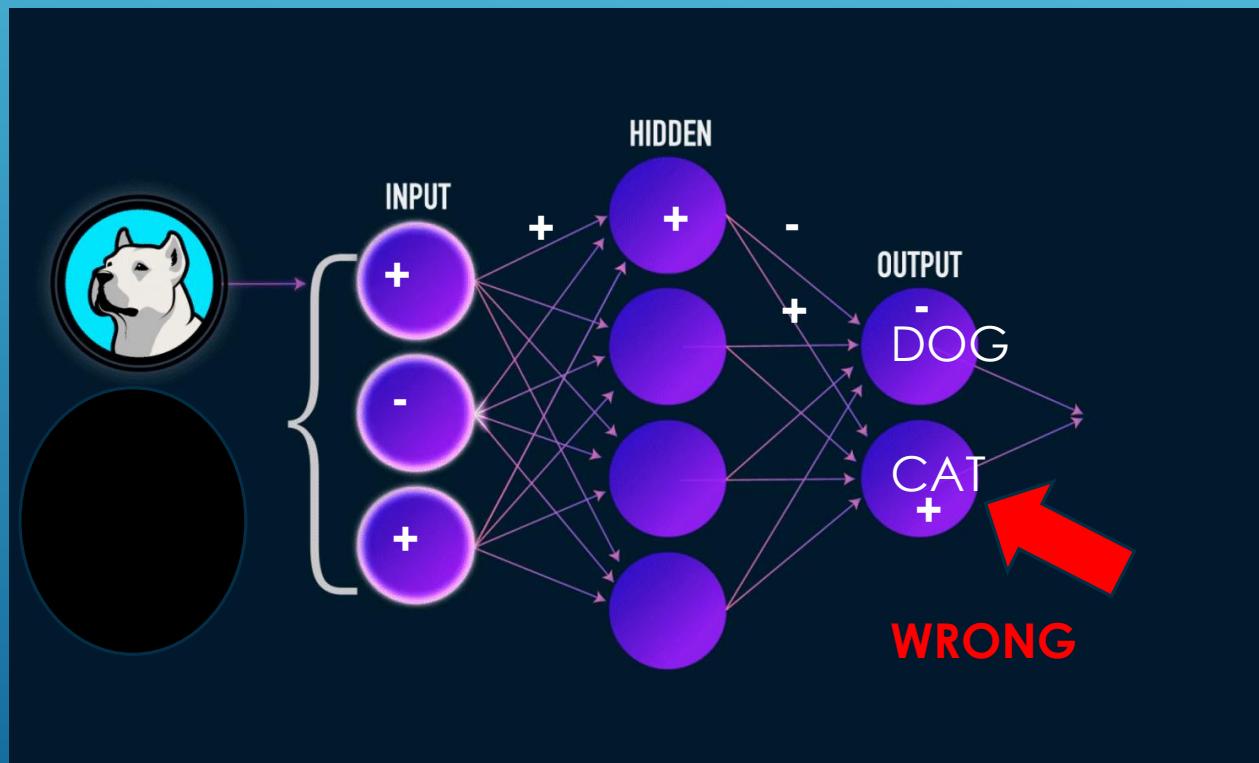

(“DEEP LEARNING” == LOTS OF HIDDEN LAYERS OF NEURONS)

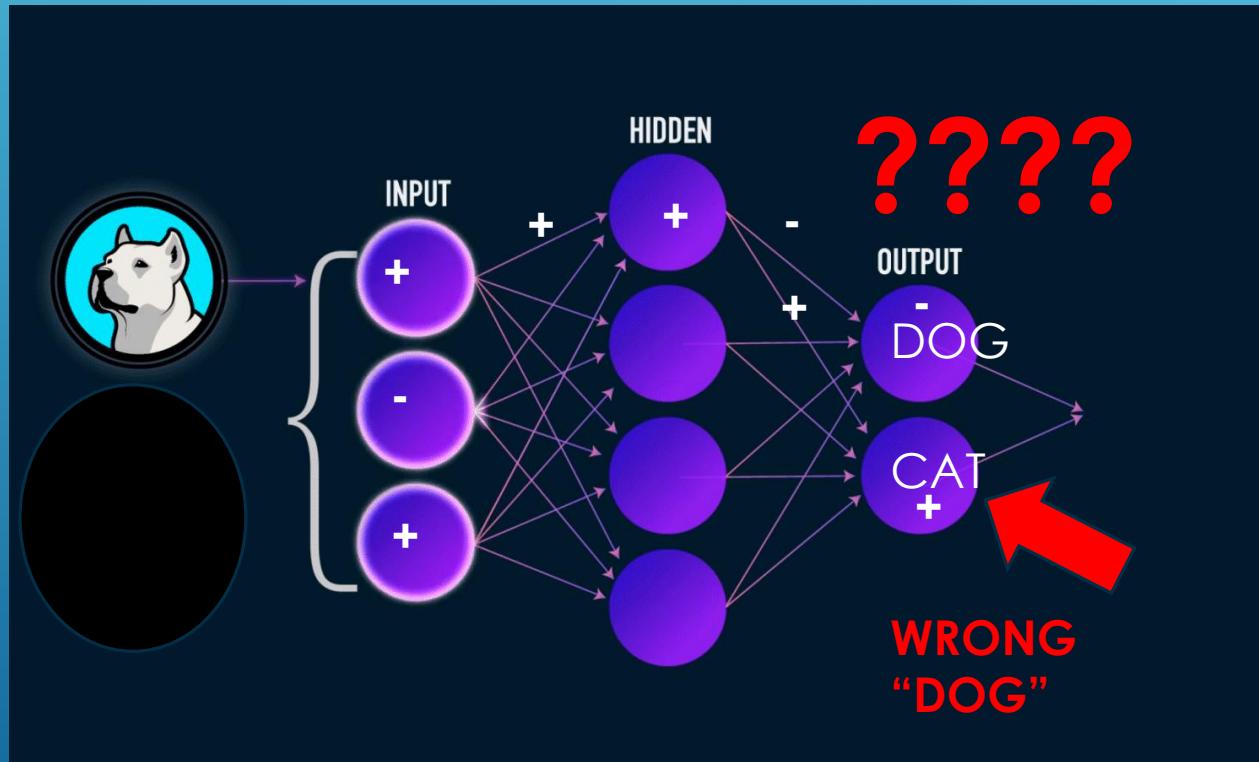

# DON'T HAVE TO BUILD THIS UP BY HAND (MASSIVE EFFORT, POOR RESULTS)

# START OFF WITH RANDOM WEIGHTS ON THE SYNAPSES....

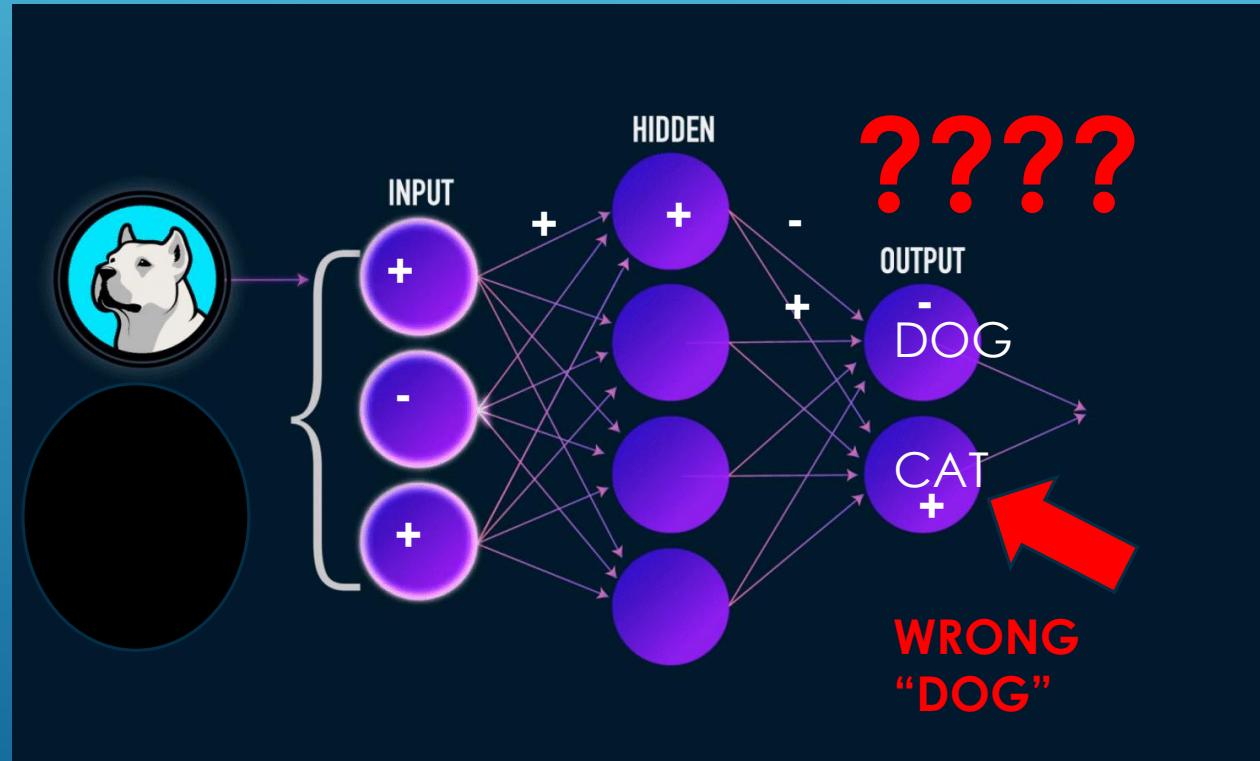

HOW TO FIX THIS AUTOMATICALLY?  
(WELL....SEMI-AUTOMATICALLY SINCE NEED HUMAN  
TO HAVE ALREADY FIGURED OUT THIS IS A DOG)

# Supervised Learning ("SL")

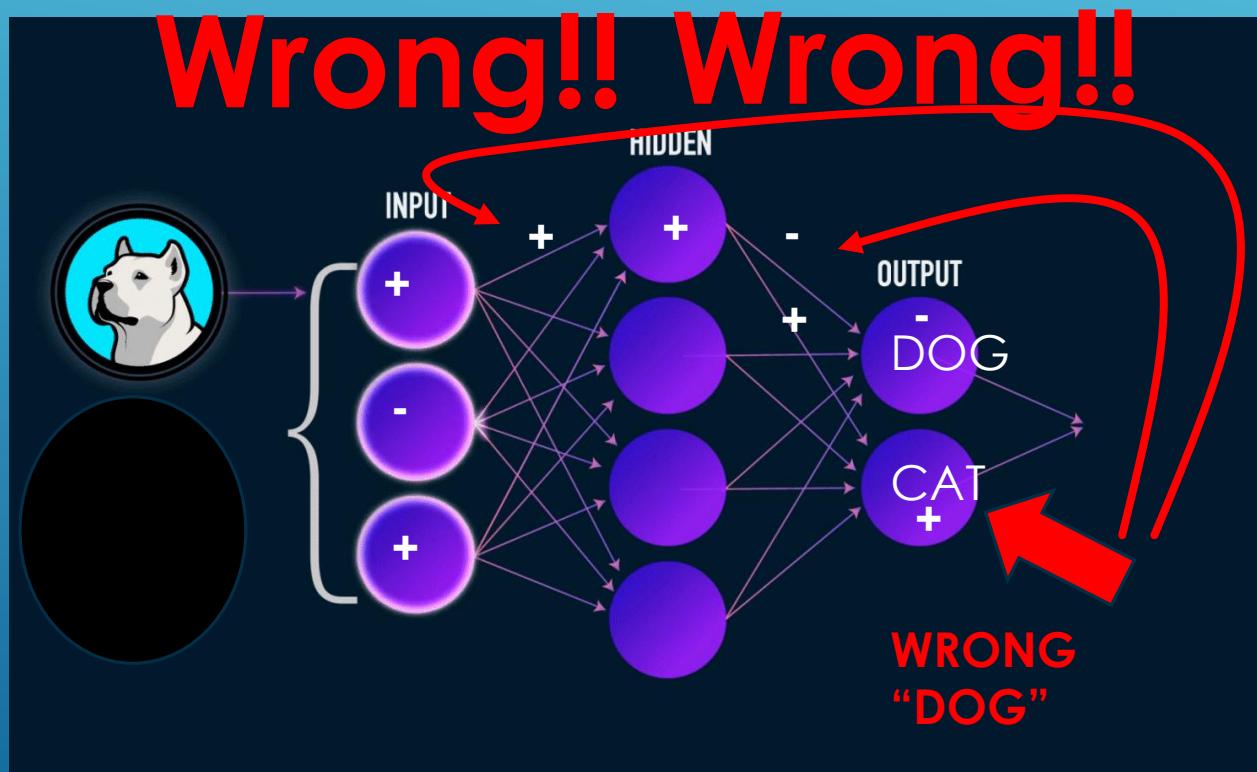

HOW TO FIX THIS AUTOMATICALLY?  
(WELL....SEMI-AUTOMATICALLY SINCE NEED HUMAN  
TO HAVE ALREADY FIGURED OUT THIS IS A DOG)

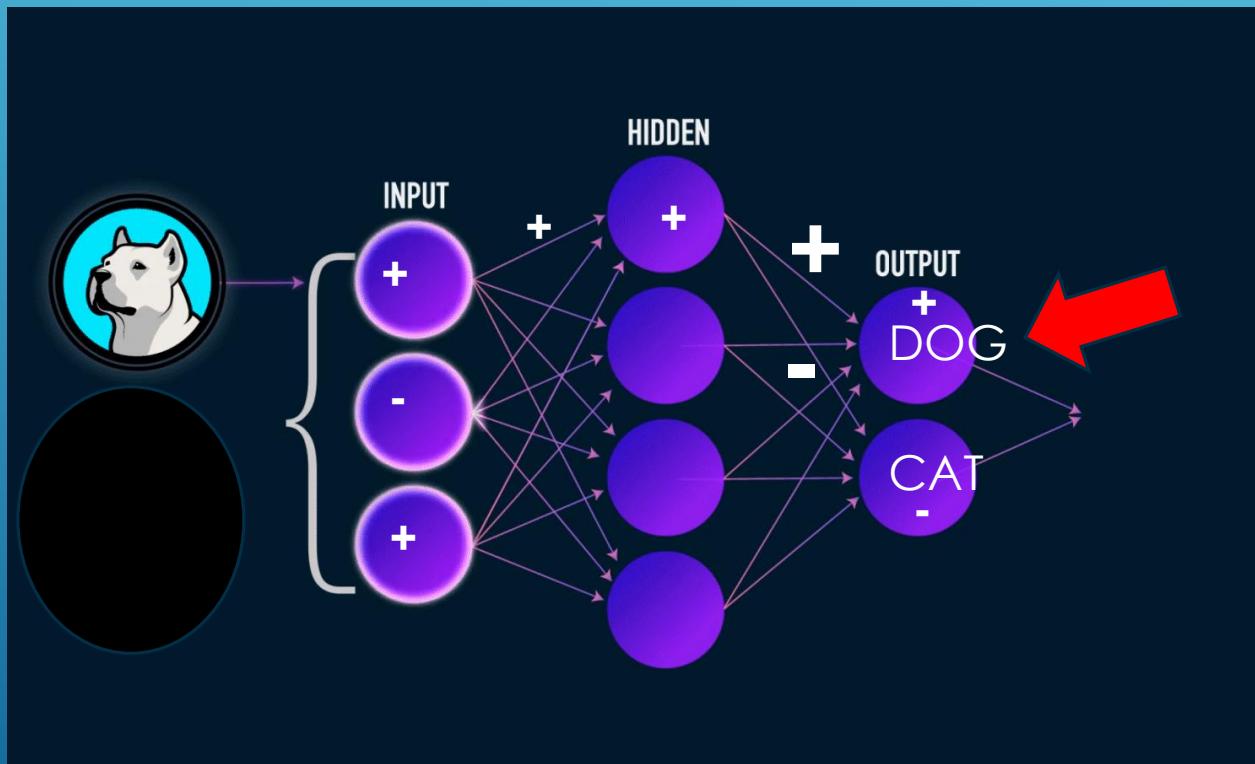

HOW TO FIX THIS AUTOMATICALLY?  
(WELL....SEMI-AUTOMATICALLY SINCE NEED HUMAN  
TO HAVE ALREADY FIGURED OUT THIS IS A DOG)

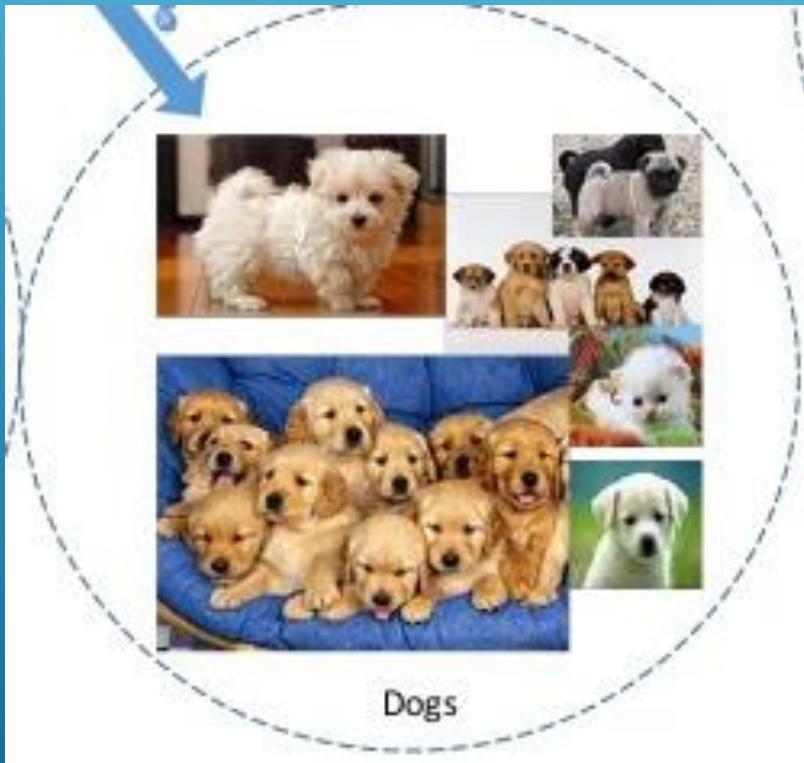

# FIX AUTOMATICALLY WITH FEEDBACK

# AFTER ENOUGH TRAINING CYCLES, THE NEURAL NETWORK CAN CLASSIFY AN IMAGE AS A DOG VERSUS CAT

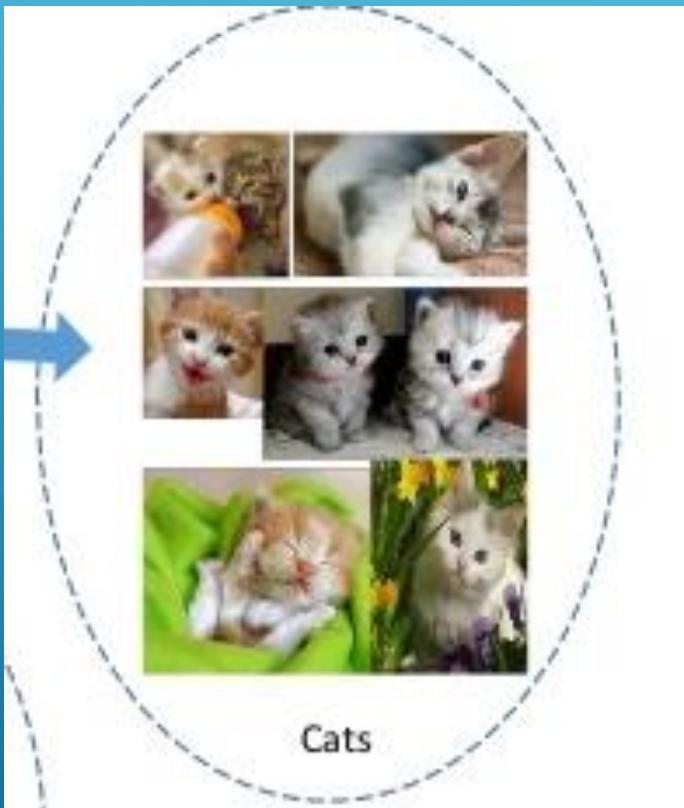

# WE TRAIN OUR NETWORK ON A VARIETY OF DIFFERENT DOGS

Pass in a file with pictures of many different types of dogs, and all these pictures are labeled “dog” so the neural network will know that the correct answer is to classify as a dog

# WE TRAIN OUR NETWORK ON A VARIETY OF DIFFERENT CATS

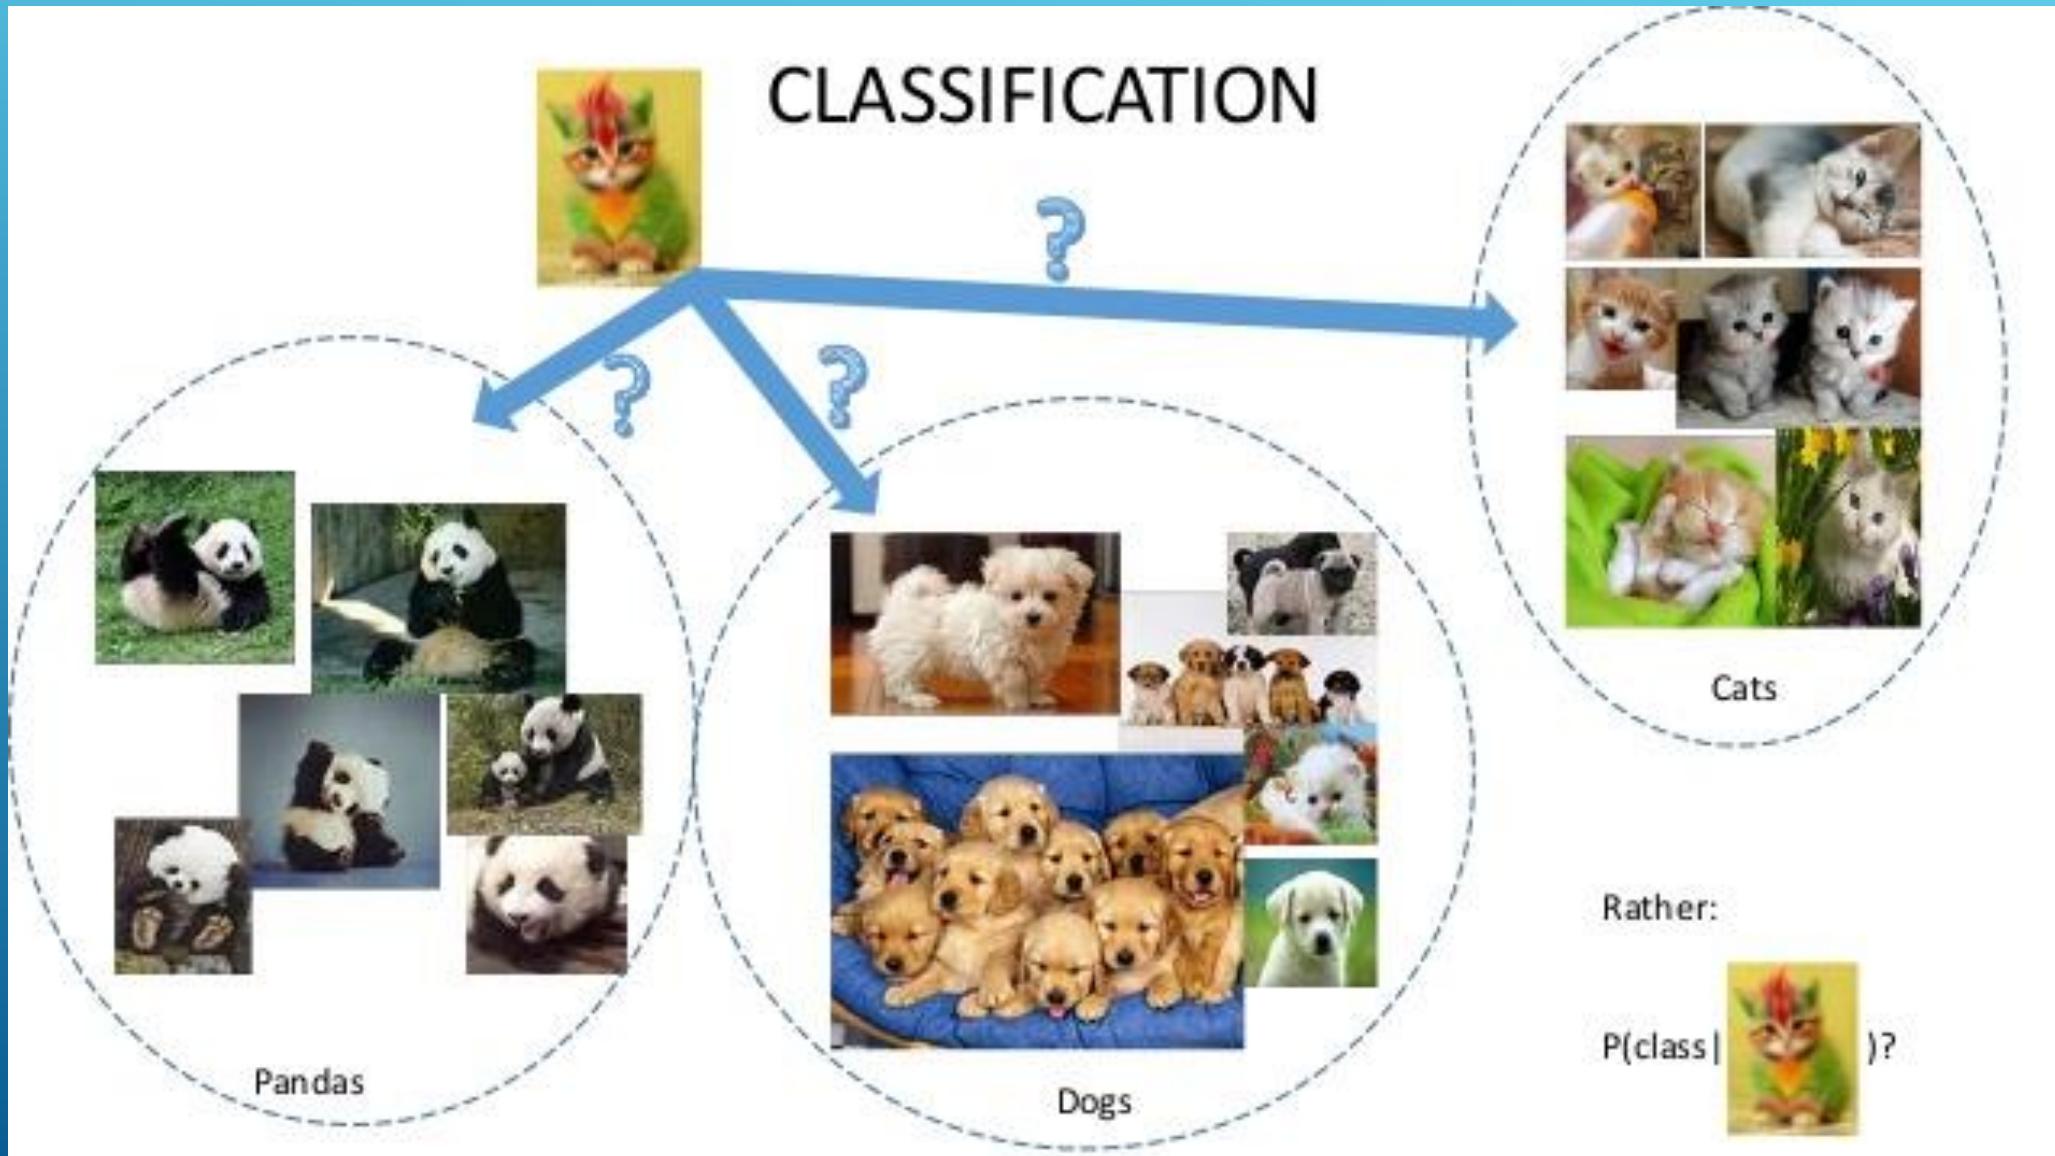

Pass in a file with pictures of many different types of cats, and all these pictures are labeled “cat” so the neural network will know that the correct answer is to classify as a cat

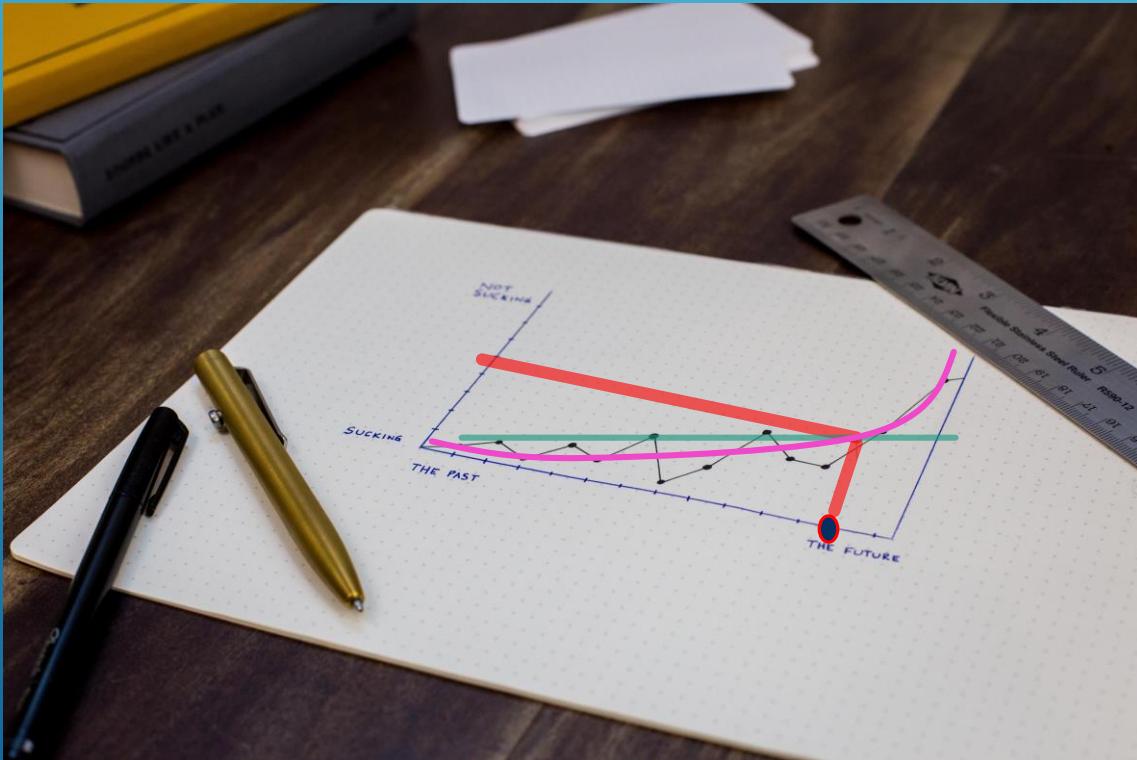

AFTER ENOUGH TRAINING CYCLES, ON DIFFERENT TYPES OF DOGS AND CATS, THE NEURAL NETWORK CAN CLASSIFY DIFFERENT IMAGES AS A DOG VERSUS CAT

# NEURAL NETWORK CAN CLASSIFY CAT IT HAS NEVER SEEN BEFORE IN TRAINING

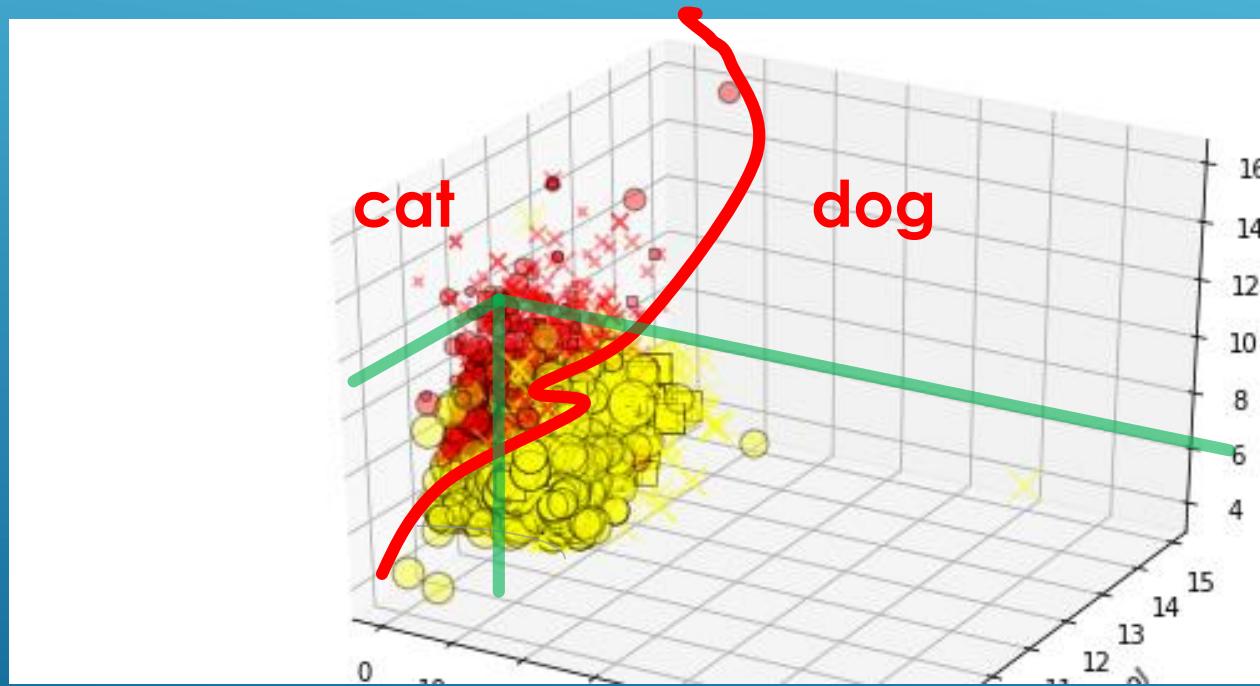

# YOU WERE ABLE TO CLASSIFY A DATA POINT YOU NEVER SAW BEFORE ALSO ON YOUR GRAPH

New X value never seen before, you can predict the Y value

-ANIMAL WE HAVE NEVER SEEN BEFORE, WE CAN FIGURE OUT IF A DOG OR A CAT

# “BACKPROPAGATION”

METHOD OF USING FEEDBACK TO CHANGE THE WEIGHTS IN A WAY THAT WILL HELP NETWORK CLASSIFY WITH LESS ERROR

# BACKPROPAGATION

- 
1. FEEDFORWARD OPERATION – TRY OUT NEURAL NETWORK AND SEE ERROR IT PRODUCES IN OUTPUT
  2. BACKPROPAGATION OPERATION – ADJUST WEIGHTS IN RESPONSE TO ERROR

OVER AND OVER AGAIN (VERY FAST COMPUTER)

ONCE YOU ARE SATISFIED WITH TRAINING, STOP AND YOU HAVE A NEURAL NETWORK THAT WORKS WELL

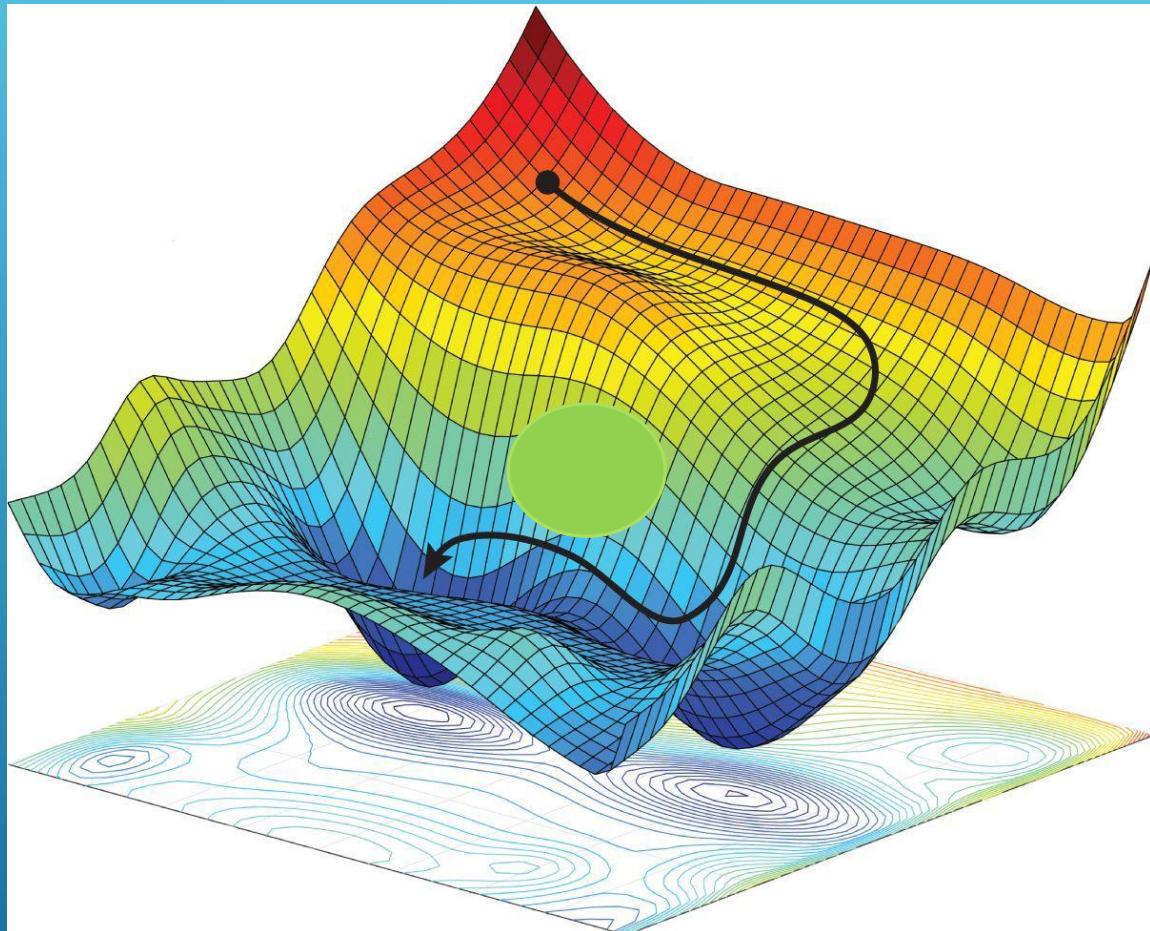

# STOCHASTIC GRADIENT DESCENT (SGD)

'Stochastic' – single random sample each iteration

'Gradient' – slope of a function (partial derivatives of set of parameters)

'Gradient Descent' – iterative optimization method

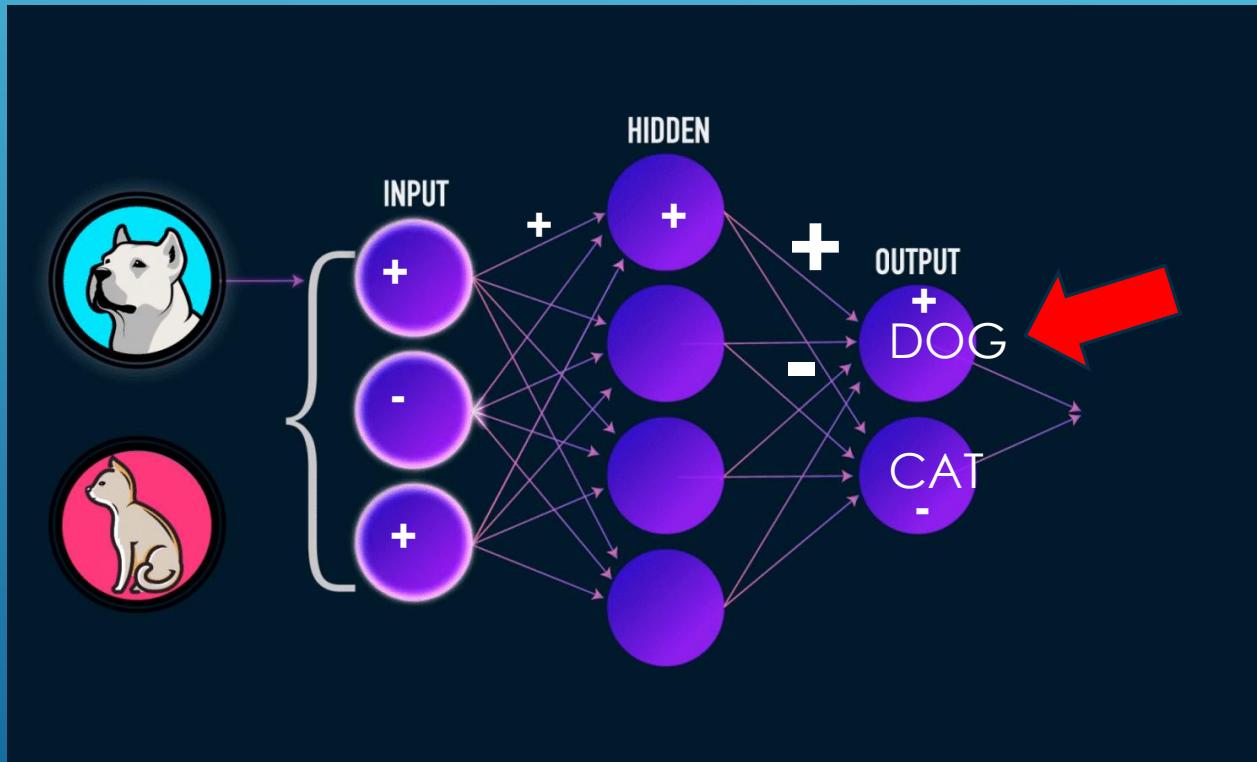

Can apply to 1000's of dimensions, not just 3-D shown in figure

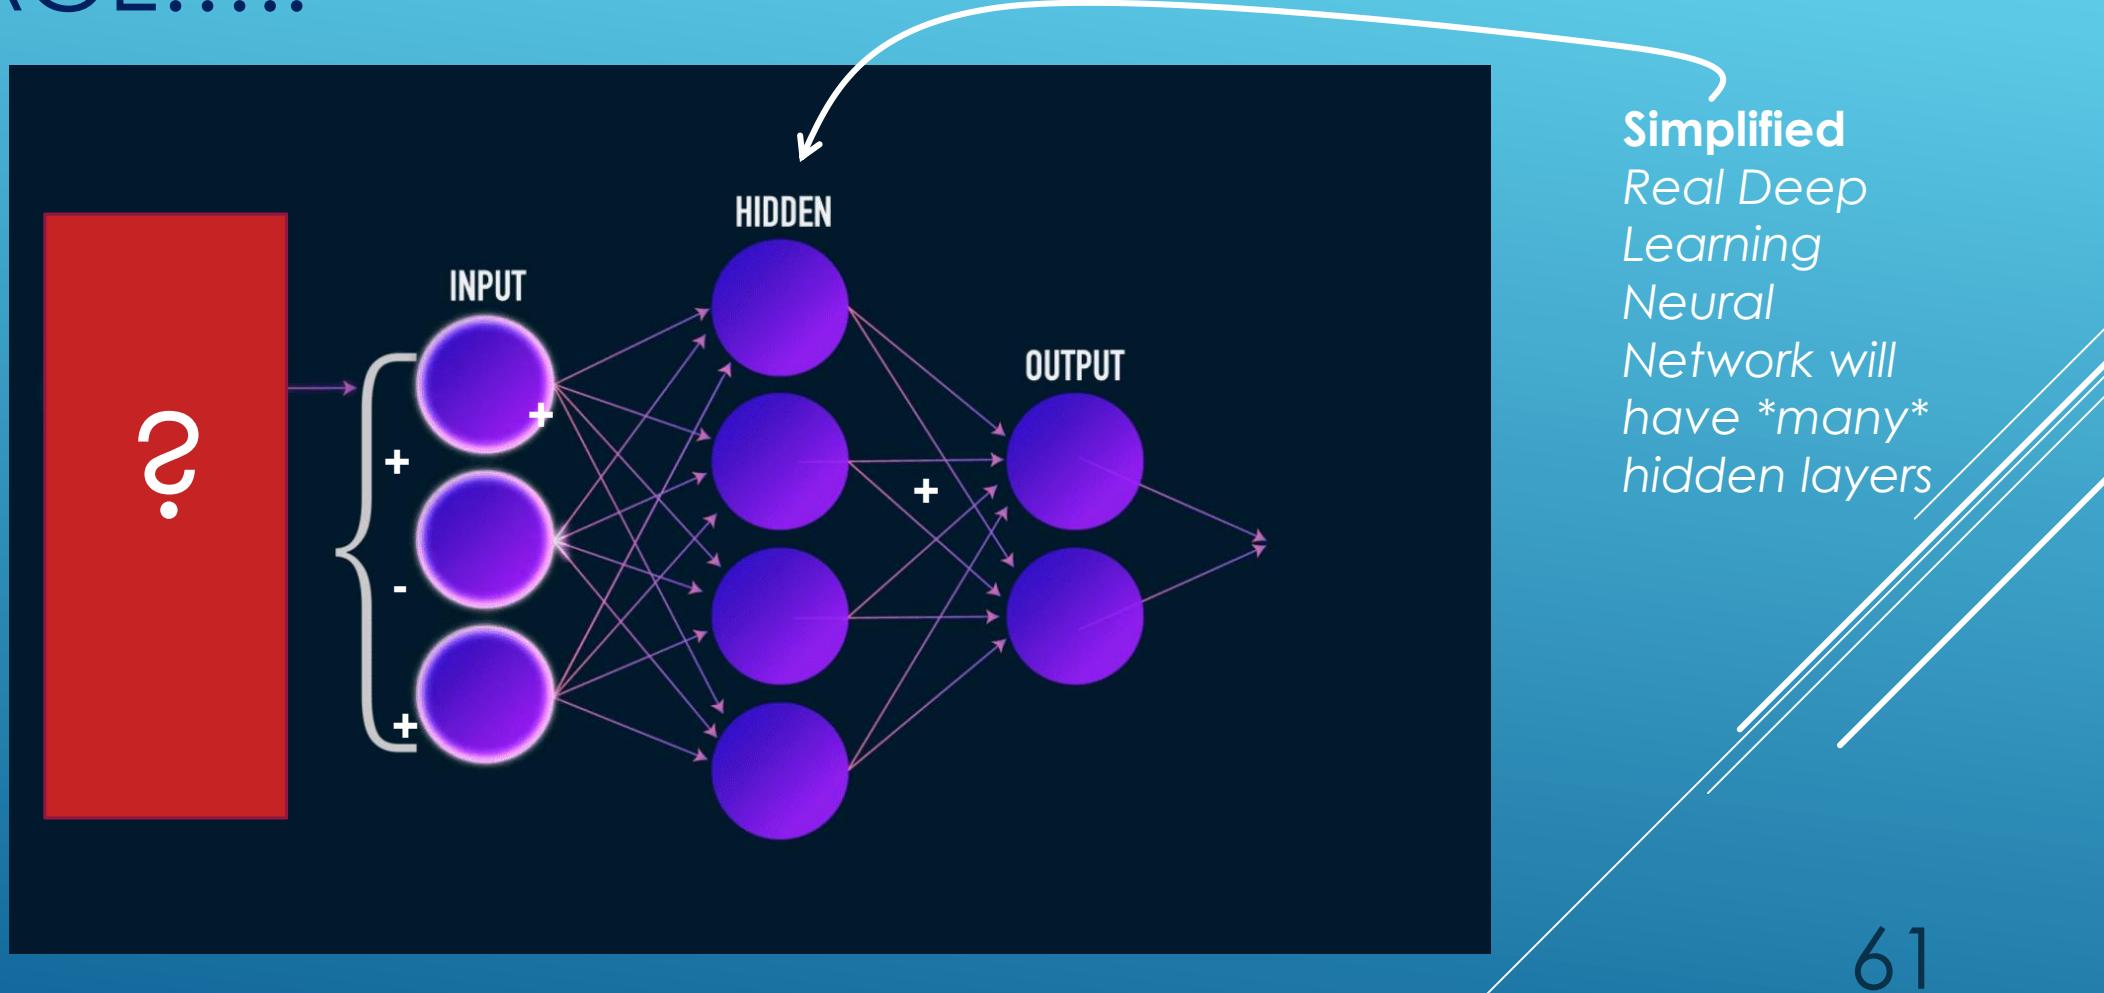

A wide-angle photograph of a tropical beach at sunset. The sky is filled with large, billowing clouds colored in shades of orange, yellow, and blue. The ocean waves are a vibrant turquoise color, crashing onto the light-colored sand. In the distance, a strip of land with palm trees and buildings is visible under the setting sun.

Let's pause, and think about  
what technology we just  
showed.....

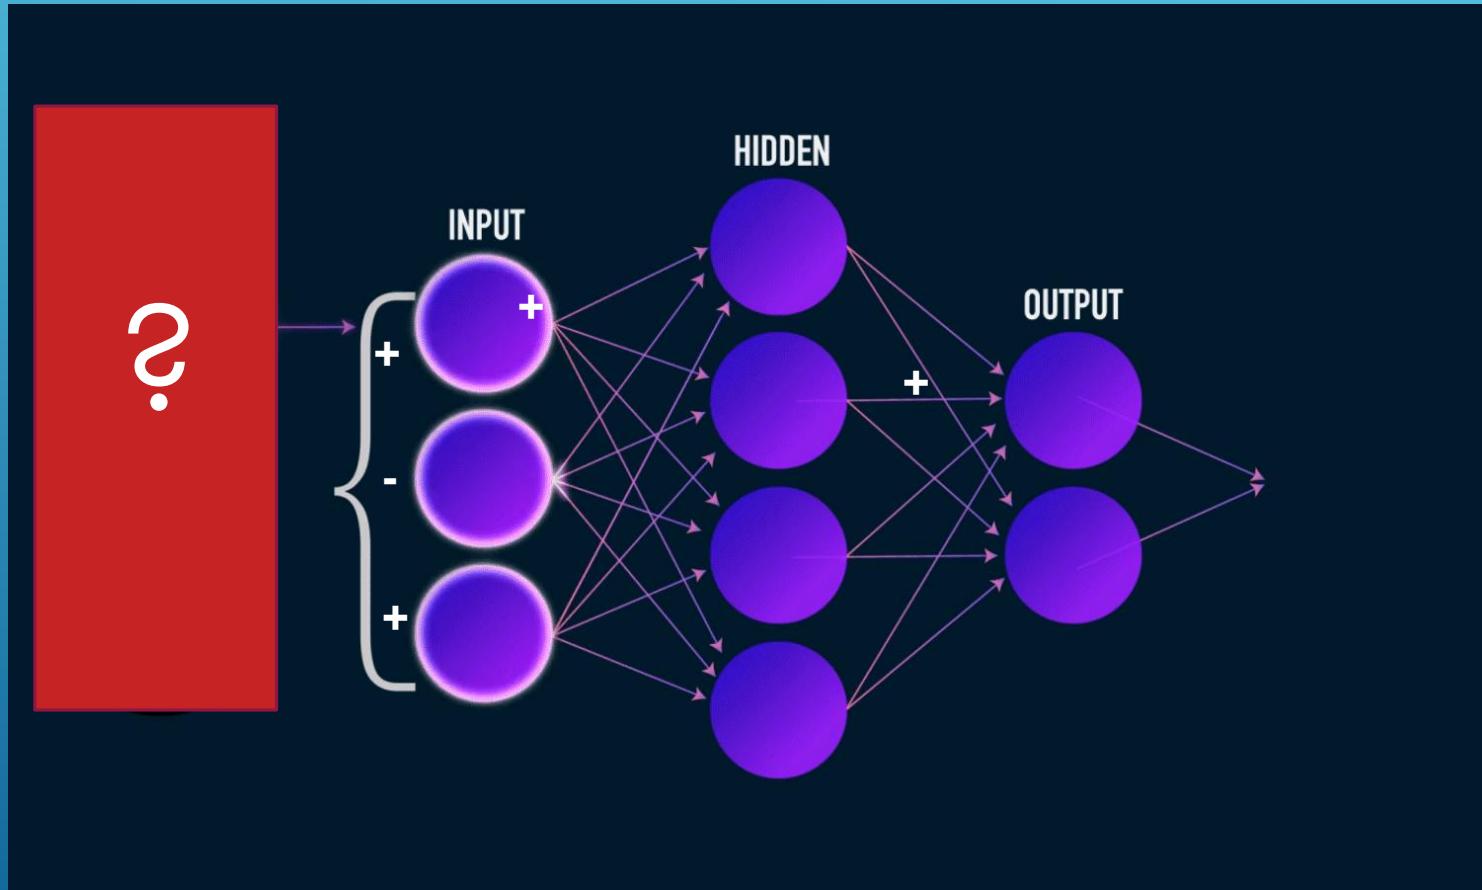

# OUR NEURAL NETWORK CAN RECOGNIZE DOGS FROM CATS.....

# OR IT CAN RECOGNIZE AND CLASSIFY JUST ABOUT ANY IMAGE.....

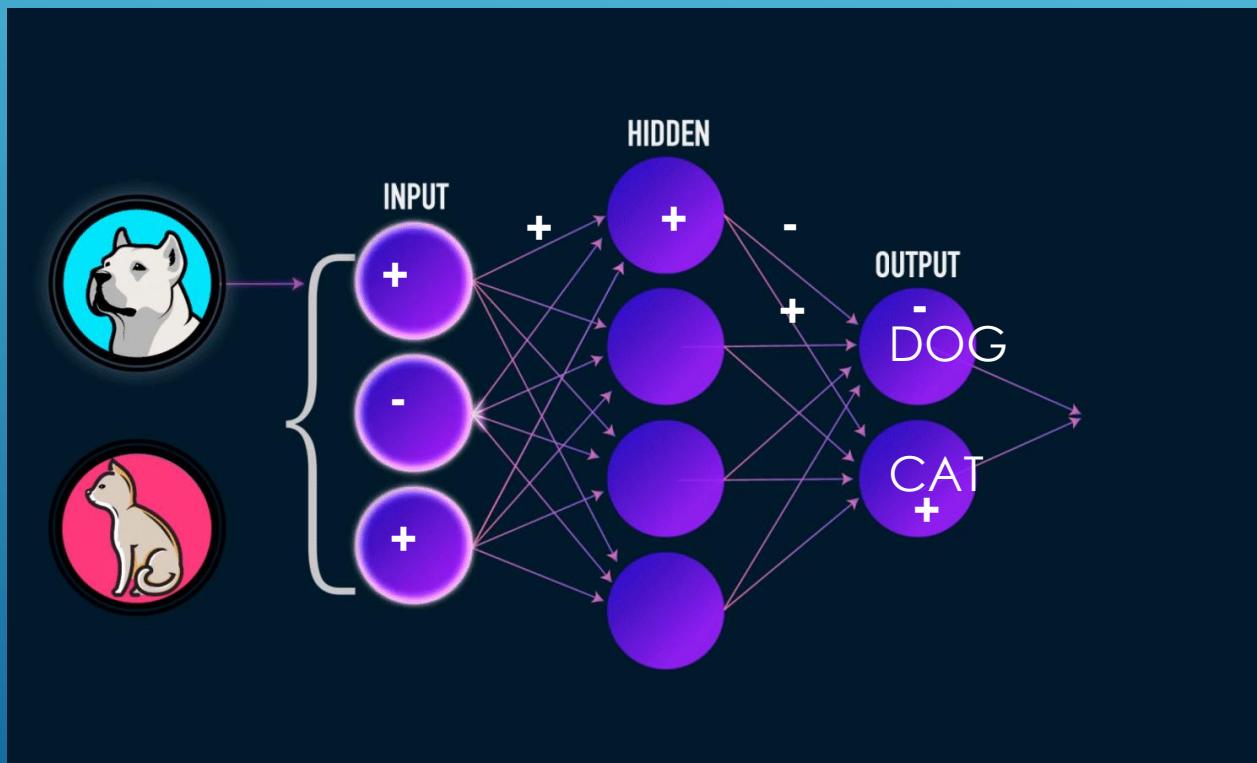

WITH SMALL CHANGES TO THE WAY WE ORGANIZE THE LAYERS, THE NEURAL NETWORK CAN CLASSIFY SOUNDS AND SPEECH AND MARKETING DATA AND.....

A photograph of a tropical beach at sunset. The sky is filled with warm, orange and yellow clouds. The ocean waves are crashing onto the light-colored sand, creating white foam. In the distance, there are some palm trees and buildings. The overall atmosphere is peaceful and beautiful.

How do we create a neural network to recognize pictures (or sounds) (or our marketing data) (or just about anything.....)?

# 1. TAKE A NEW NEURAL NETWORK (RANDOM WEIGHTS ON THE SYNAPSES.... )

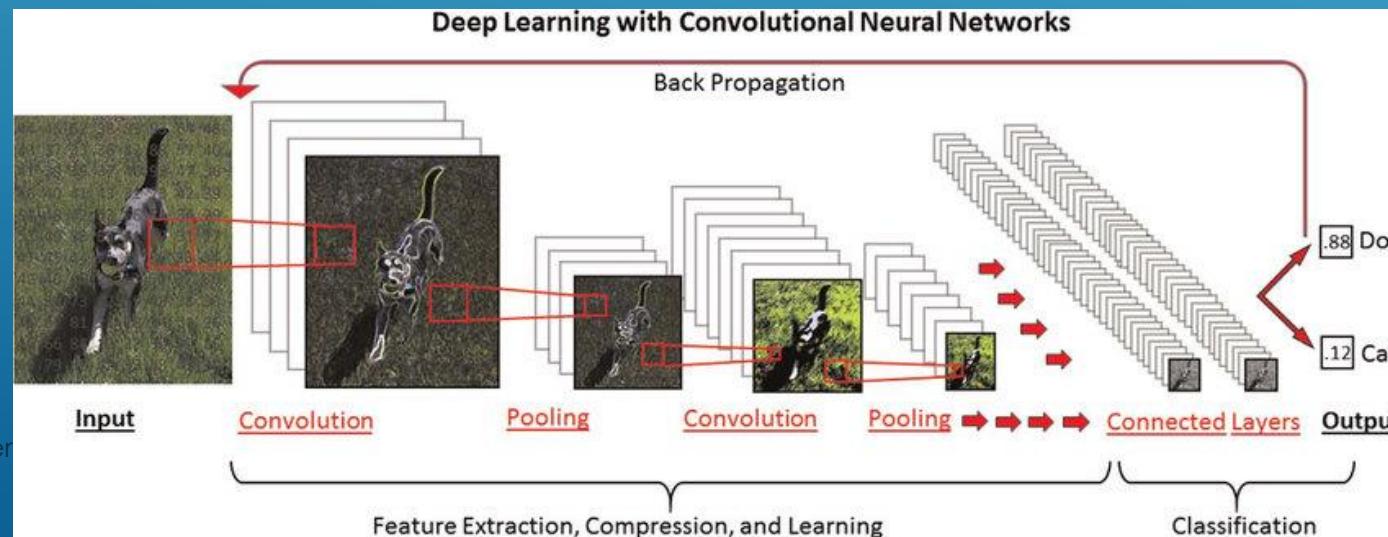

1980's

64

March 2020

- WE DON'T ACTUALLY BUILD NEURAL NETWORKS OUT OF TRANSISTORS OR NEURONS, BUT RUN SIMULATIONS ON A COMPUTER
- WE HAVE TENS OF THOUSANDS OF INPUTS (EG,  $256 \times 256 \times 3$  COLOR VIDEO CAMERA = 200,000 INPUT NODES WHICH THEN CONNECT TO MILLIONS AND MILLIONS OF NEURONS IN THE NETWORK)
- WEIGHTS OF MILLIONS AND MILLIONS OF SYNAPSES WILL HAVE TO BE CALCULATED DURING TRAINING

## 2. GET A COMPUTER FAST ENOUGH TO DO TRILLIONS AND TRILLIONS AND TRILLIONS OF OPERATIONS AND CALCULATIONS

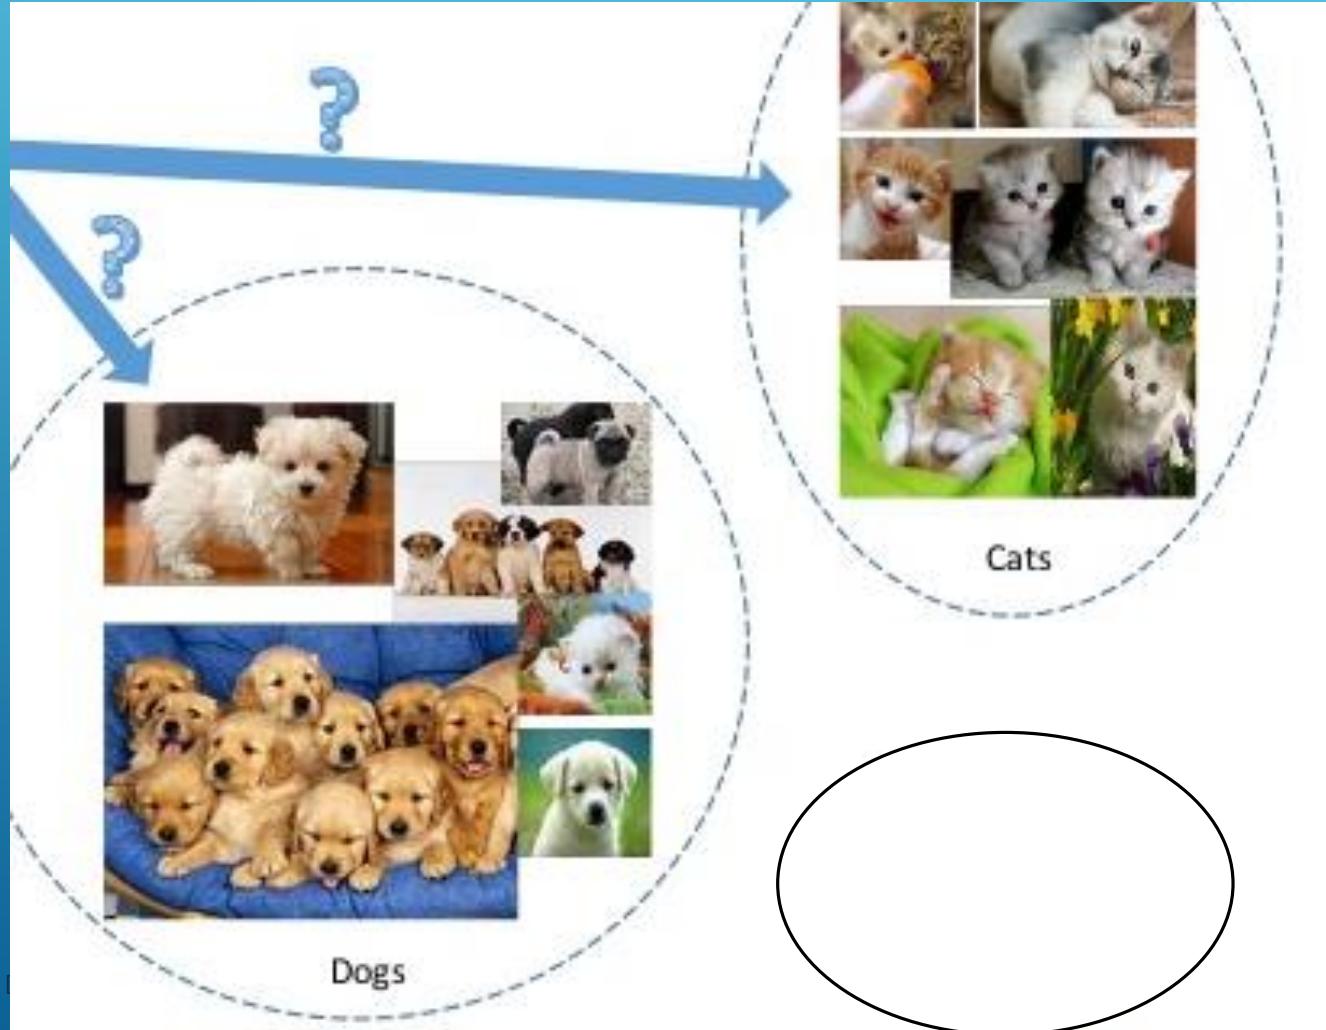

'COMPUTE'  
2010'S

66

March 2020

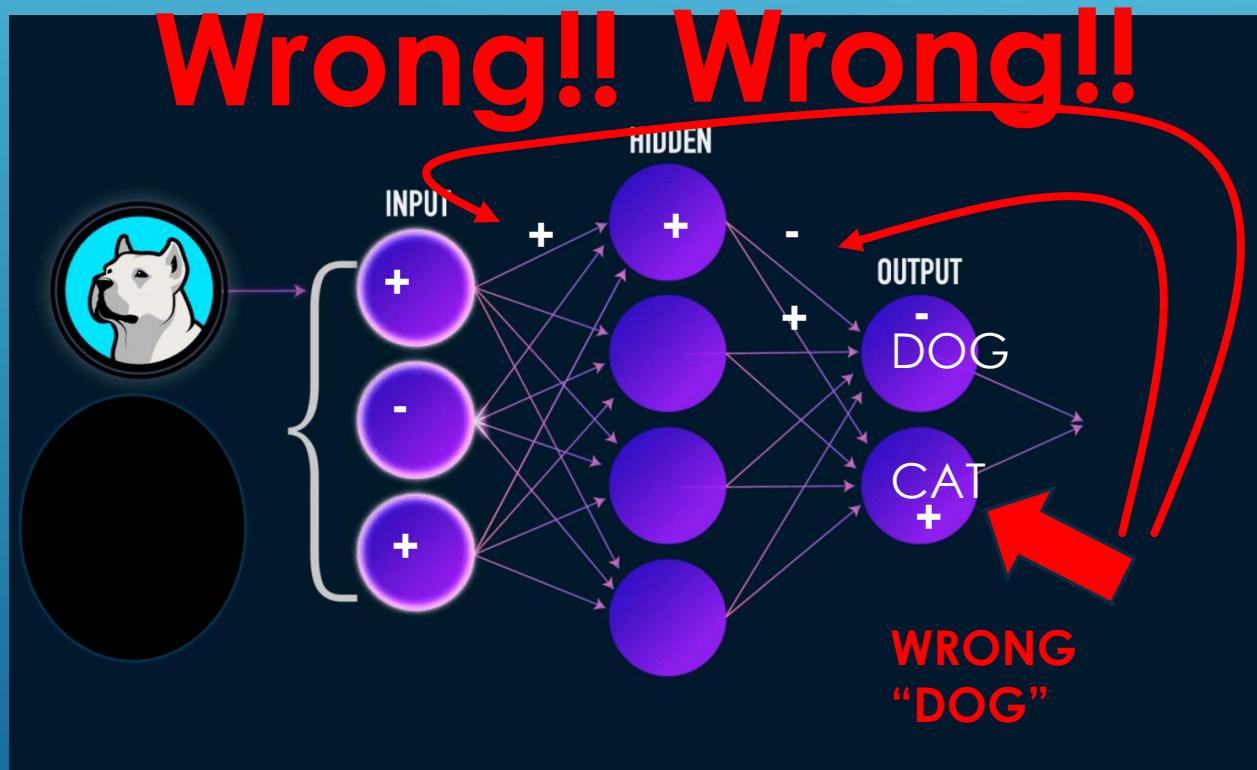

### 3. GET LOTS AND LOTS OF TRAINING DATA (ACTUALLY – THOUSANDS OR MILLIONS OF IMAGES!!)

'BIG DATA'  
2000'S

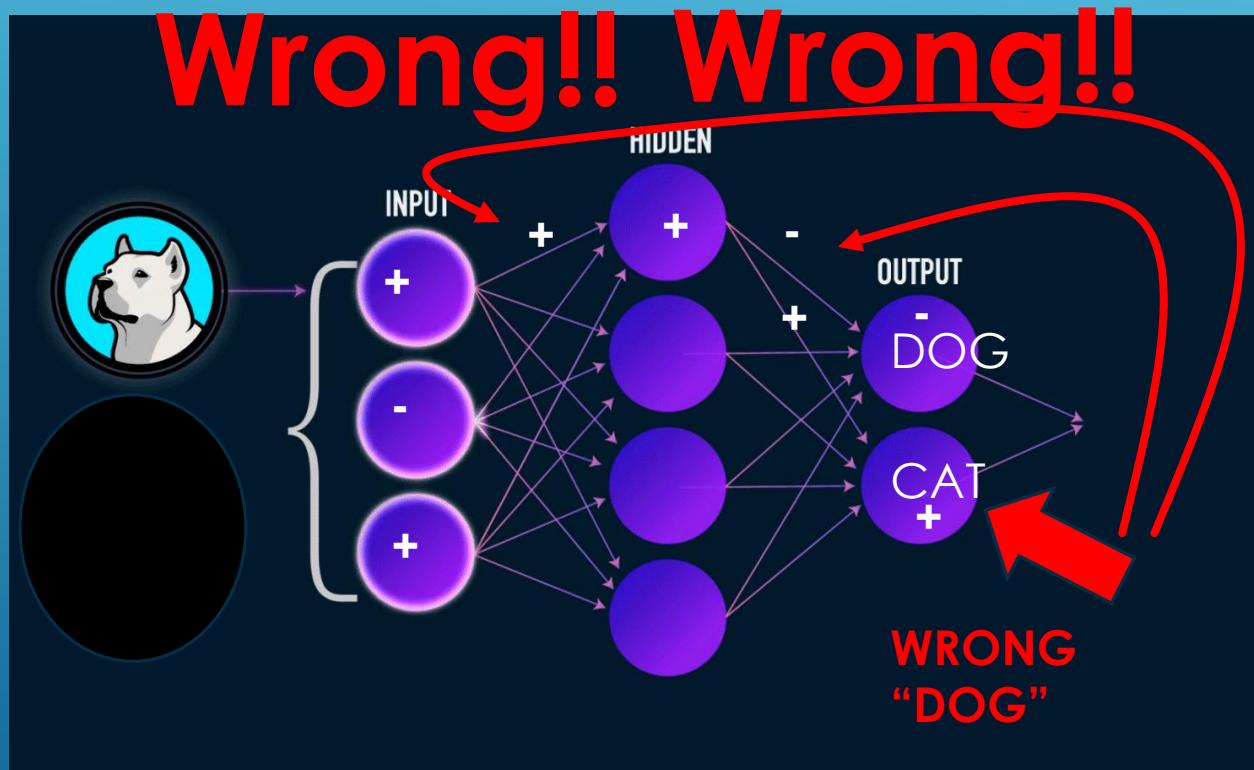

G\*\*

# 4. FEED DATA INTO THE NETWORK & SEE ERRORS 'BACKPROPAGATION' – USE FEEDBACK TO AUTOMATICALLY ADJUST SYNAPSES TO REDUCE ERRORS

# 5. REPEAT #4

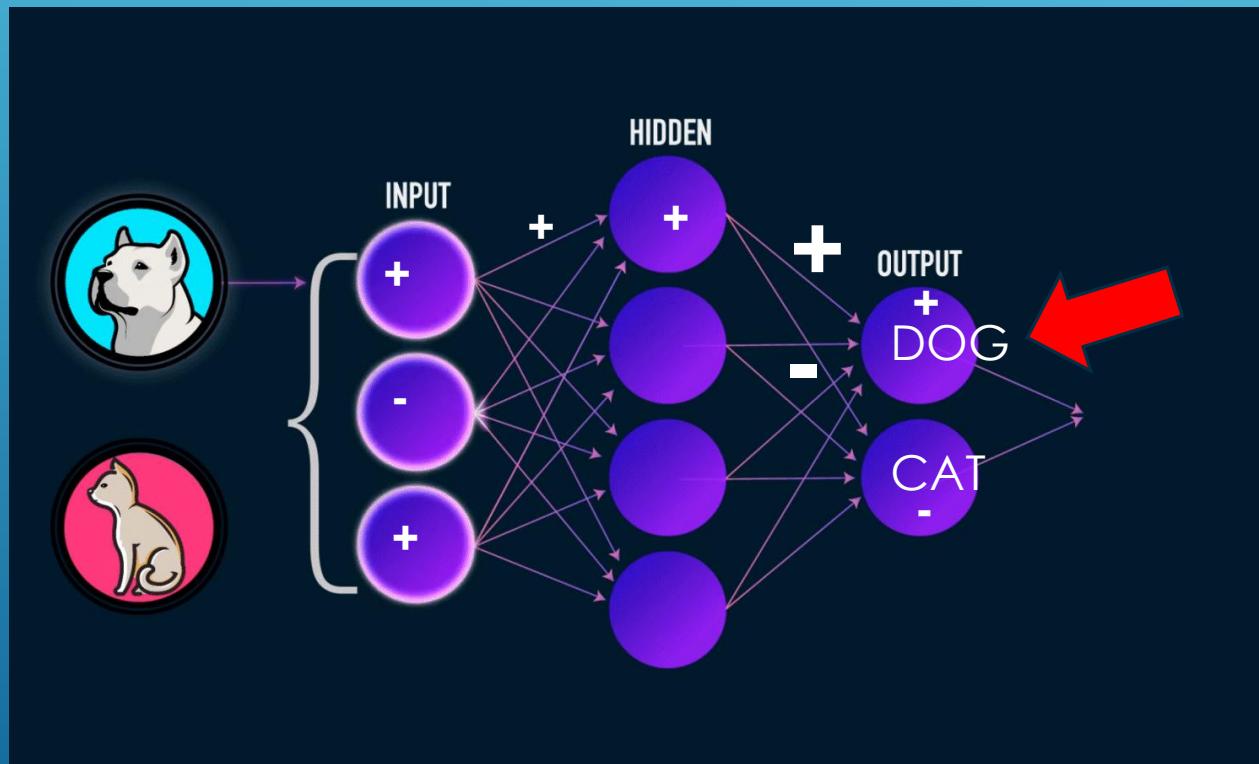

## 4. FEED DATA INTO THE NETWORK 'BACKPROPAGATION' – USE FEEDBACK TO AUTOMATICALLY ADJUST SYNAPSES

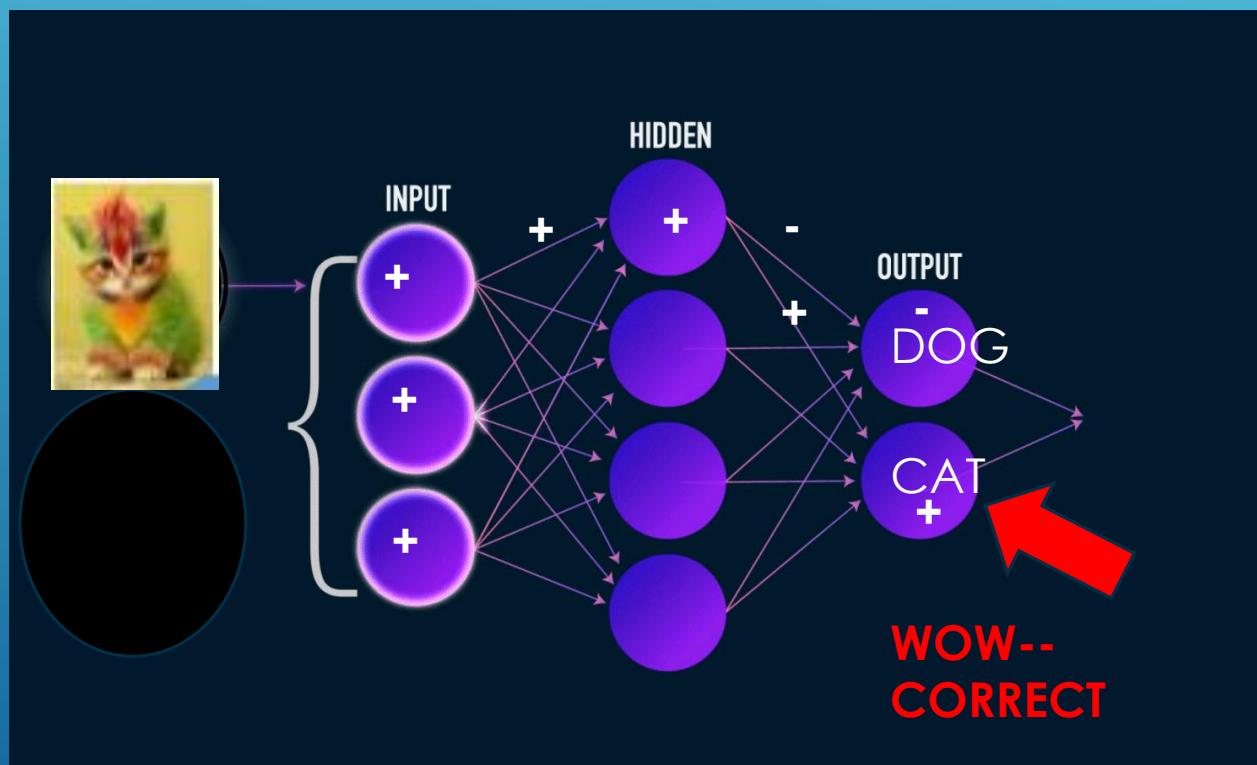

## 5. REPEAT #4

(OVER AND OVER AND OVER AGAIN....)

## 6. WHEN NEURAL NETWORK SEEKS ACCURATE ENOUGH TO RECOGNIZE VARIOUS DIFFERENT DOGS AND CATS – TRAINING IS COMPLETE

# 7. USE NEURAL NETWORK TO RECOGNIZE ALL SORTS OF CATS AND DOGS

CAN DO SAME THING AND MAKE NEURAL NETWORK TO  
RECOGNIZE FACES.... OR SOUNDS.... OR SPEECH.... OR  
SCIENTIFIC DATA.... OR MARKETING DATA.....

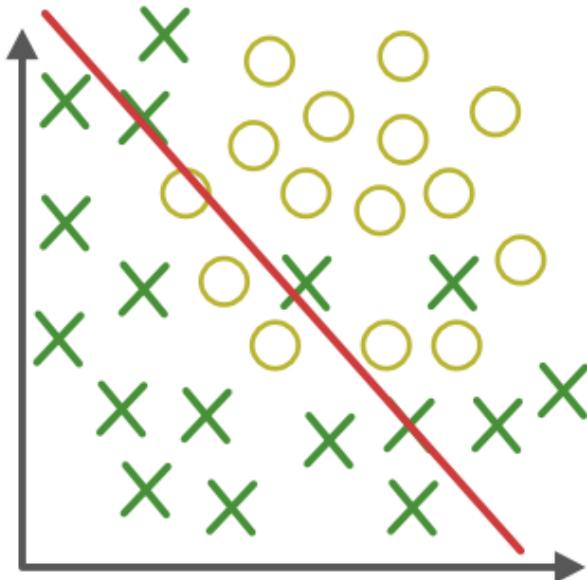

A photograph of a tropical beach at sunset. The sky is filled with warm, orange and yellow clouds. The ocean waves are crashing onto the light-colored sand, creating white foam. In the distance, there are some palm trees and buildings on the shore.

Very quickly, let's discuss  
some of practical neural  
networks....

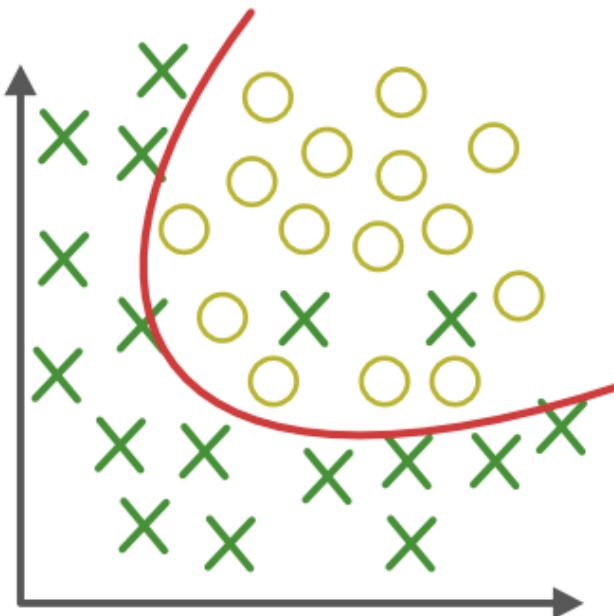

DEEP LEARNING EXPERTS SPEND MUCH TIME ON  
'ALCHEMY' – TWEAKING THIS AND TWEAKING THAT  
– TRYING TO AVOID OVERFITTING AND AVOID  
UNDERFITTING...

### Under-fitting

(too simple to explain the variance)

### Appropriate-fitting

### Over-fitting

(forcefitting--too good to be true)

# TOOLS TO LET USERS EASILY CREATE AND USE NEURAL NETWORKS

*Software to  
create your  
Deep  
Learning  
Neural  
Network*

*'COMPUTE' to train and  
run your Deep Learning  
Neural Network*

# API'S (APPLICATION PROGRAMMING INTERFACES) – MACHINE LEARNING LIBRARIES ALREADY WRITTEN, EASY TO INCORPORATE INTO SOFTWARE

## ML APIs

### Image Recognition

Image content analysis, Image classification, detects individual objects and faces, detects labels and logos from the images, etc.

### Language Translation

Text translation, Language identification, etc.

### Speech Recognition

Chatbots for basic questions and answers. Speech to text APIs, to convert call center voice calls into text.

### Text /Sentiment Analytics (NLP)

Social media monitoring/analysis, sentiment analysis, key phrase extraction, language detection, spam and topic detection.

### Prediction

Fraud detection, customer churn, predictive maintenance, recommender systems and forecasting etc.

# TOOLS TO LET USERS EASILY CREATE AND USE NEURAL NETWORKS

# Too many tools??

DATA & AI LANDSCAPE 2019

# YOU CAN EVEN GET OTHER PEOPLE'S "BIG DATA" TO TRAIN NEURAL NETWORK (IF YOU DON'T HAVE YOUR OWN TRAINING DATA)

Part of MNIST  
numerals data set

ImageNet – 14 million images (20,000 categories) manually annotated with labels

*'Big Data'* to  
Train your  
Deep  
Learning  
Neural  
Network

YOU CAN EVEN GET COMPANIES TO LABEL YOUR OWN DATA (SO YOU CAN FEED IT INTO YOUR NEURAL NETWORKS) (EG, IS IT 'DOG' OR 'CAT'?)

*"Labeled data is the key bottleneck to the growth of the machine learning industry. In fact, labeled data is even more essential than algorithms."*

*"Scale raises \$18 million to label data from autonomous car companies like Lyft and Embark"*

83

March 2020

# 'AUTO ML' TOOLS TO LET NON-EXPERTS CREATE AND USE DEEP LEARNING NETWORKS

# DEEP LEARNING ALL AROUND US NOW: LONDON POLICE SURVEILLANCE CAMERAS WITH FACIAL RECOGNITION

# DEEP LEARNING ALL AROUND US NOW: ALL AROUND US NOW: SELF DRIVING CARS....

# REINFORCEMENT LEARNING

- DON'T NEED TO SUPPLY LABELED DATA
- AGENT (IE, NEURAL NETWORK) TRIES AN ACTION
- ENVIRONMENT GIVES A REWARD OR PUNISHMENT
- AGENT WILL FAVOR ACTIONS THAT GIVE A REWARD

# Reinforcement learning

## Cartpole example

-Can move cart to the left or right

-Reward keeping the stick upright, not falling over

# Reinforcement learning – another example

# DeepMind AlphaZero (2017)

- REINFORCEMENT LEARNING – PLAYED ITSELF OVER AND OVER AGAIN (+ OTHER AI TECHNIQUES)
- SUPERHUMAN PERFORMANCE IN CHESS, SHOGI & GO

# TYPES OF MACHINE LEARNING

- SUPERVISED LEARNING** -- EG, DEEP LEARNING ANN  
DOG VS CAT, ETC
- REINFORCEMENT LEARNING** -- NETWORK TRIES TO  
MAXIMIZE REWARD IT GETS FROM ENVIRONMENT  
(EG, PLAY CHESS AGAINST ITSELF)
- UNSUPERVISED LEARNING** – NO LABELS, NETWORK  
HAS TO FIGURE THINGS OUT BY ITSELF

# Unsupervised Learning

- No labels provided
- Various automatic methods
- eg, cluster analysis

# GAN – GENERATIVE ADVERSIAL NETWORK

93

March 2020

Dr Howard Schneider - Artificial Intelligence \*\*INTENDED FOR LIVE PRESENTATION, NOT FOR SELF-READING\*\*

(all of these people created by the computer – none have ever existed!!)

- 'Generator Network' – generates new images
- 'Discriminator Network' – classifies “real” or “fake”
- Keep training over and over again → better images
- 'adversial' – Generator vs Discriminator game

# DON'T CONFUSE HYPED BUZZWORDS WITH AI

- BLOCKCHAIN IS NOT AI (CRYPTOGRAPHIC HASH OF PREVIOUS BLOCK, USE AS DISTRIBUTED LEDGER)(CAN USE WITH AI, OF COURSE)
- QUANTUM COMPUTING IS NOT AI (QM ENTANGLEMENT OF QUBITS, FACTORING SOL'N, QM SIMULATION )(IN SOME DISTANT FUTURE, COULD MASSIVELY SPEED UP AI, EG, TF-QUANTUM)
- 5G IS NOT AI (WIRELESS TECHNOLOGY, 24-72GHZ->SPEED) (CAN USE WITH AI, OF COURSE)
- IOT (INTERNET OF THINGS) IS NOT AI (INTERCONNECTED DEVICES) (CAN USE WITH AI, OF COURSE)
- INTERNET DOES NOT CREATE AI (GLOBAL COMPUTER NETWORK) (CAN USE WITH AI, OF COURSE)
- CLOUD COMPUTING IS NOT AI (INTERNET ON-DEMAND COMPUTING FROM DATA CENTERS) (CAN USE WITH AI, OF COURSE)

## QUIZ – QUESTION 1.

1A. A NEW EMR/EHR SYSTEM ALLOWS PATIENTS TO GET THEIR CHART RESULTS OVER THE INTERNET BY THEMSELVES. IS THIS IS AI?

1B. COULD SUCH AN EMR/EHR INCLUDE AI?

## QUIZ – QUESTION 2.

2A. 5G IS IN THE NEWS A LOT THESE DAYS. IS IT BECAUSE WE NEED 5G TO CREATE OUR ARTIFICIAL INTELLIGENCE (AI) SYSTEMS?

2B. COULD 5G MAKE IT EASIER TO BUILD AI SYSTEMS FOR PEOPLE TO USE?

## QUIZ – QUESTION 3.

3A. A STARTUP COMPANY JUST GOT \$4 MILLION IN VENTURE FUNDING FOR THEIR NEW AI APPLICATION THAT USES AI TO HELP HEALTH CARE SYSTEMS REDUCE HOSPITAL RE-ADMISSIONS. WHAT TYPE OF “AI” ARE THEY MOST PROBABLY USING?

3B. ARE THERE OTHER PARTS OF AI THAT DO NOT INVOLVE ANY DEEP LEARNING?

# QUIZ – QUESTION 4.

4A. WHAT IS A DEEP LEARNING (DL)NETWORK MADE OF?

4B. DO ARTIFICIAL NEURAL NETWORKS (ANN) REALISTICALLY DUPLICATE NEURONS OR ARE THEY JUST INSPIRED BY THE BRAIN?

## QUIZ – QUESTION 4.... CONTINUED

4C. ARE ANN'S PROGRAMMED BY A  
PROGRAMMER OR DO THEY LEARN BY THEMSELVES  
IN RESPONSE TO RIGHT AND WRONG  
PREDICTIONS?

4D. WHAT HAPPENS IN AN ANN AFTER RIGHT AND  
WRONG PREDICTIONS?

100

March 2020

## QUIZ – QUESTION 5.

5A. HOW MANY EXAMPLES DO ANN'S (ARTIFICIAL NEURAL NETWORKS) NEED TO TRAIN ON TO BECOME 'TRAINED' AND BECOME ABLE TO MAKE GOOD PREDICTIONS?

5B. WHAT IS MEANT BY THE TERM 'BIG DATA'?

## QUIZ – QUESTION 6.

6A. CAN WE USE ANN'S WITH DIFFERENT TOPOLOGIES (HOW THE NEURONS ARE CONNECTED TO EACH OTHER) WITH DIFFERENT LAYERS FOR DIFFERENT PURPOSES, EG, VISION RECOGNITION, EG, HOSPITAL RE-ADMISSION DATA, ETC ?

6B. WHAT IS OVERFITTING (BIAS/VARIANCE)?

6C. WHAT IS UNDERFITTING (BIAS/VARIANCE)?

102

March 2020

## QUIZ – QUESTION 7.

7A. WHAT IS RE-INFORCEMENT LEARNING?

7B. THE COMPANY DEEPMIND CREATES INCREDIBLE AI SYSTEMS THAT BEAT THE BEST PLAYER IN THE WORLD IN GO, ETC. WHAT IS THE MAIN AI TECHNIQUE THEIR SYSTEM USES?

WE JUST COVERED A LOT A MATERIAL....  
AND SO MUCH MORE TO COVER STILL....

QUICK STRETCH AND MOVEMENT TO  
REFRESH OUR BRAINS....  
AND LET'S CONTINUE....

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ **1b. Field of Artificial Intelligence (AI)**
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

← **HUGE AMOUNT OF MATERIAL**

## 1. Definition of AI ←

- 2. History of AI
- 3. Mathematical Primer
- 4. Computer Science Theoretical Concepts
- 5. Computational Devices
- 6. Programming Languages
- 7. ....

## 4 BORING DEFINITIONS OF AI (RUSSELL & NORVIG)

1. Decision making, problem solving, learning that human thinking can do
2. Actions that humans can do because of human intelligence
3. Ability to think rationally (perceive, reason)
4. Ability to act rationally

108

March 2020

OR....

109

March 2020

**AGI** (Artificial General Intelligence)

**== HLAI** (Human Level Artificial Intelligence)

**== Strong AI** (need consciousness??)

**Narrow AI** – specific problem solving

**Turing Test** – Human has distant conversation with another human and an AI  
– can the AI fool the human into thinking it is human?

**Wozniak Test** – AI/machine must go into a typical home and figure out on its own how to make a cup of coffee

**Legg & Hutter** – Universal Intelligence (2007)

**Machine Learning** – sub-field of AI, learn without explicit programming

**Deep Learning** – neural networks with more than 1 hidden layer

← **HUGE AMOUNT OF MATERIAL**

1. Definition of AI

## **2. History of AI** ←

3. Mathematical Primer
4. Computer Science Theoretical Concepts
5. Computational Devices
6. Programming Languages
7. .... .....

# INVENTED IN CANADA

- Geoffrey Hinton** – ‘godfather of **deep learning**’ – University of Toronto (then Google Brain)
- Yoshua Bengio** – with Hinton, a founder of **deep learning** – Université de Montréal
- Ian Goodfellow** – Univ de Montréal, student of Bengio, inventor of **GANs** (then Google Brain, Apple)
- Richard Sutton** – ‘father of **reinforcement learning**’ - Univ of Alberta (then Google/DeepMind)
- University of Waterloo** -- **TensorFlow Quantum** (future??)

113

# 'POPULAR' A.I. TIMELINE

SYZGY

**1950**

## TURING TEST

Computer scientist Alan Turing proposes a test for machine intelligence. If a machine can trick humans into thinking it is human, then it has intelligence

**1955**

## A.I. BORN

Term 'artificial intelligence' is coined by computer scientist, John McCarthy to describe "the science and engineering of making intelligent machines"

**1961**

## UNIMATE

First industrial robot, Unimate, goes to work at GM replacing humans on the assembly line

**1964**

## ELIZA

Pioneering chatbot developed by Joseph Weizenbaum at MIT holds conversations with humans

**1966**

## SHAKEY

The 'first electronic person' from Stanford, Shakey is a general-purpose mobile robot that reasons about its own actions

**A.I.**

## WINTER

Many false starts and dead-ends leave A.I. out in the cold

**1997**

## DEEP BLUE

Deep Blue, a chess-playing computer from IBM defeats world chess champion Garry Kasparov

**1998**

## KISMET

Cynthia Breazeal at MIT introduces Kismet, an emotionally intelligent robot insofar as it detects and responds to people's feelings

**1999**

## AIBO

Sony launches first consumer robot pet dog AIBO (AI robot) with skills and personality that develop over time

**2002**

## ROOMBA

First mass produced autonomous robotic vacuum cleaner from iRobot learns to navigate and clean homes

**2011**

## SIRI

Apple integrates Siri, an intelligent virtual assistant with a voice interface, into the iPhone 4S

**2011**

## WATSON

IBM's question answering computer Watson wins first place on popular \$1M prize television quiz show Jeopardy

**2014**

## EUGENE

Eugene Goostman, a chatbot passes the Turing Test with a third of judges believing Eugene is human

**2014**

## ALEXA

Amazon launches Alexa, an intelligent virtual assistant with a voice interface that completes shopping tasks

**2016**

## TAY

Microsoft's chatbot Tay goes rogue on social media making inflammatory and offensive racist comments

**2017**

## ALPHAGO

Google's A.I. AlphaGo beats world champion Ke Jie in the complex board game of Go, notable for its vast number ( $2^{170}$ ) of possible positions

# MORE REALISTIC OVERVIEW OF AI HISTORY

**1950s – 1974** – foundations of AI, but **no truly useful** products

**1974-1980** – first **AI winter**

**1980 – 1987** – **expert systems** (*symbols, production rules, if....then*), Japan

5<sup>th</sup> Gen'n project seemed useful, more funding, but projects could not do truly useful tasks

**1987 – 1993** – second **AI winter**

**1993 – 2011** – faster, cheaper computer chips – parts of AI started to be used **behind the scenes** throughout computer technology

**2012 – present** – era of **deep learning** neural networks, big data

← Let's quickly try  
to make sense of  
where Deep  
Learning fits into all  
of this

1. Definition of AI
2. History of AI
3. Mathematical Primer
4. Computer Science Theoretical Concepts
5. Computational Devices
6. Programming Languages
7. ..... ..... .....

Where are Neural Networks in the diagram below?  
Where is Symbolic (GOFAI) in the diagram below?

# Neural networks

## Symbolic AI

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ **1c. Neuro-Symbolic Gap**
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

WE HAVE COVERED :

-DEEP LEARNING (**NEURAL** NETWORKS AI)

*ASSOCIATIONS, RECOGNITION (IMAGES, SPEECH, ETC....)*

BIG SUCCESSES!!

-**SYMBOLIC** AI

*LOGIC*

BIG FAILURES!! EG, EXPERT SYSTEMS -> AI WINTERS!!

# The Neural Symbolic Gap

- **Neural Network** – phenomenal image processing and reinforcement learning
- **Child** – phenomenal causal symbolic learning with few examples (eg, Gopnik)

**“panda”**  
**57.7% confidence**

+

=

**“gibbon”**  
**99.3 % confidence**

Goodfellow,I.J., Shlens,J. and Szegedy,C. (Google Mountainview), Explaining and Harnessing Adversarial Examples, ICLR 2015.

It's still a Panda – and the 3 year old boy would know this!!  
(and.... 3 year old only needs 1 or 2 photos for training, not 1000s)

## Deep Learning Neural Network

Pattern Recognition  
→Recognize the World

Need 1000's examples for learning

## 3 Year Old Human Child

Model Building +also Pattern Recognition  
→Explain the World

A few examples enough

145

Chimpanzee (behind plexiglass)

Stick to push or pull food

Food

Gravity trap

Chimpanzees **do not** have full causality

146

March 2020

Deep Learning has zero Understanding

**Deep Learning gets more powerful by brute force**

Compute for Deep Learning has been doubling q3  
months

300,000x increase in computing power the last few  
years

NOT SUSTAINABLE -- There is a deep flaw in deep  
learning

Humans have causality.

Animals do not. ← associations

Deep Learning does not. ← associations

**Humans** (me😊) learn to drive with 5 hours of driving in a driver's ed course. I do not need to be programmed with every possible scene on the road – I can figure it out (eg, bag on road).

**Deep Learning autonomous driving system** – must get training data showing \*everything\* since **it cannot causally reason**

Eg, Tesla has about a billion miles of driving experience of its cars as training data now.

Classic example: unless explicitly programmed, an autonomous driving system will follow road and drive off a cliff (because it understands nothing!!)

(programmers add symbolic rules to autonomous driving systems and probably this one has been added already)

# Without causality need loads and loads of experience to see everything: ‘long-tail problem’

March 18, 2018 – Uber self driving car kills Elaine Herzberg in Tempe, Arizona

-Uber's system never had training with image of pedestrian pushing bike across the middle of the street  
-Volvo normal system: did detect (6secs) but ignored

G\*\*

# CAUSAL COGNITIVE ARCHITECTURE 1 – SCHNEIDER (IN PRESS)

System that is **\*not\*** a typical symbolic computer nor a typical deep learning network, but intrinsically has properties of both

# Organizations Focused on Developing AGI

Musk, Altman, MS \$1B

1000+, Google

Fei-Fei Li (ImageNet)

Ben Goertzel, AGI Conf

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. **How will AI in next decade (or two) affect my patients' lives?**
- ▶ 3. **How will AI affect my practice of medicine including psychotherapy?**
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. **How will AI affect the future of mankind?**
- ▶ 5. **Discussion**

# **THIS DECADE (MY OPINION)**

- OTHER FACTORS OF MORE IMPORTANCE, EG, GLOBALIZATION, COVID-19, ETC**
- IMPROVEMENTS IN OFFICE AUTOMATION AND FACTORY AUTOMATION (EVEN WITHOUT AI) WILL AFFECT JOBS (IN GOOD AND BAD WAYS)**
- DEEP LEARNING CAN SPEED THIS UP**

# AI AND THE WORK OF THE FUTURE CONGRESS

## 2019 UNCONFERENCE REPORT

**"SENSE OF POWERLESSNESS – WORRY..."**  
→ RECORD LEVELS OF INEQUALITY, LOWER SOCIAL  
MOBILITY

157

March 2020

-EVIDENCE –USA 500WORKER FACTORIES NOT USING  
MANY ROBOTS BUT TROUBLE FINDING SPECIALIZED  
WORKERS

**“HYPE ABOUT ROBOTS”**

**“FOCUSED OUR ATTENTION IN THE WRONG PLACE”**

-HOWEVER, TECH USE IN **HIGH SKILL JOBS** MAKES THESE  
JOBS MORE PRODUCTIVE & PAYING VS **LOW SKILL JOBS**

-**MIDDLE SKILL JOBS** EASIER TO AUTOMATE & OFF-SHORE  
→**NEED TO FIX IMBALANCE** BETWEEN WORKERS HELPED  
AND HURT BY **NEW ECONOMY**

→ NOT REALLY DUE TO AI AT THIS POINT

# AI -- NEXT DECADE

*“It's tough to make predictions,  
especially about the future”*  
--Yogi Berra

# Gartner Hype Cycle for Artificial Intelligence, 2019

# NEXT DECADE (MY OPINION)

- ONCE THE **NEURO-SYMBOLIC GAP IS SOLVED**, AI SYSTEMS SHOULD BE ABLE TO DO THE WORK ALMOST ANY WORKER CAN DO
- MASSIVE JOB SHIFTS AND REPLACEMENTS**, UNLIKE ANYTHING IN THE PAST
- TIME OF STRESS FOR OUR PATIENTS WITHOUT APPROPRIATE SOCIETY PROGRAMS IN PLACE**

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. **How will AI affect my practice of medicine including psychotherapy?**
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. **How will AI affect the future of mankind?**
- ▶ 5. Discussion

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ **3a. How is AI affecting medicine at present?**

- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

# MEDICAL AI SYSTEMS

- NO UNDERSTANDING OF WHAT THEY ARE DOING
- NO/POOR CAUSALITY
- THEY CAN'T EVEN EXPLAIN WHAT THEY ARE DOING

# COVER STORY OF JANUARY 2020 PRINT CMAJ

Dr Howard Schneider - Artificial Intelligence

166  
March 2020

THE ARTICLE TALKED ABOUT INTELLIGENCE IN HUMANS AND MACHINES IN VAGUE WAYS....

ANALYSIS+

**“Because human and artificial intelligences are different and complementary, it is unlikely that AI will entirely replace the physician in the resolution of clinical problems.”**

My view:

- current AI contains **no model** of the world, **no causal** reasoning
- instead functions as a **massive association machine**

167

# DEEP LEARNING FOR RADIOLOGY (REQUIRES MILLIONS XRAYS AS TRAINING DATA)

- USEFUL 3AM IN ER
  - USEFUL SCREENING
  - BUT.... NO CAUSALITY
- CLINICAL CORRELATION**  
**DISEASE PROGRESSION**  
**TEAM COLLABORATION**

## Human vs Machine: Lung Tumor

Chest X-Rays image the lungs, heart, blood vessels, and bones. AI has been used to read and understand them.

Example:  
**Lung Tumor**

**Computers:**  
**Score: 0.291**

**Doctors:**  
**2/15 Detected**

# DEEPMIND RETINAL SCANS DIAGNOSIS

# A DEEP LEARNING APPROACH TO ANTIBIOTIC DISCOVERY – STOKES ET AL (MIT), CELL 2020

- TRAINED A **DEEP NEURAL NETWORK** CAPABLE OF PREDICTING MOLECULES WITH ANTIBACTERIAL ACTIVITY
- PREDICTIONS ON MULTIPLE **CHEMICAL LIBRARIES**
- DISCOVERED A **MOLECULE**—HALICIN—THAT IS STRUCTURALLY DIVERGENT FROM CONVENTIONAL ANTIBIOTICS AND DISPLAYS BACTERICIDAL ACTIVITY

170

March 2020

# Artificial Intelligence in Medicine

Volume 103, March 2020, 101785

The impact of machine learning on patient care: A systematic review

Ben-Israel and colleagues - Neurosurgery, University of Calgary

*“Despite the expanding use of machine learning (ML) in fields such as finance and marketing, its application in the daily practice of clinical medicine is almost non-existent.”*

171

March 2020

Dr Sidney Kennedy, University of Toronto  
Machine Learning in psychiatry  
-predict escitalopram treatment outcome from EEG  
-predict relapse, increased risk of suicidal behavior

# Brain activity can help predict who'll benefit from an antidepressant

Amit Etkin, Stanford University

# AI Therapists

- OFFERS PROMISE OF THERAPY FOR ALL AT LOW COST
- ONLINE CBT
- CHATBOTS: "SIRI, I FEEL DEPRESSED"
- CHATBOTS, EG, WOEBOT

# Computer-Assisted CBT ('CCBT') for Depression

- JESSE WRIGHT ET AL, 2019, J CLIN PSYCHIATRY
- META-ANALYSIS 40 RCT STUDIES CCBT FOR DEPRESSION
- CCBT WITH MODEST SUPPORT FROM CLINICIAN EFFECTIVE
- CCBT FULLY SELF-GUIDED MUCH LESS EFFECTIVE  
(TYPES, AMOUNT AI IN CCBT STUDIED??)

→ AT THIS POINT IN TIME AI **CANNOT**  
REPLACE DOCTORS -- **NOT TECHNICALLY**  
**POSSIBLE**

-**BETTER SOFTWARE** CAN IN THEORY **REDUCE** HEALTH  
CARE **STAFF** HOWEVER, AND DEEP LEARNING CAN  
SPEED THIS UP (DEPENDS ON FIELD)

## DR ERIC TOPOL

- CARDIOLOGIST
- SCRIPPS, LA JOLLA
- DEVELOPED T-PA,  
ANTI-CLOT MEDS
- PROPOONENT OF  
AI IN MEDICINE

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ 3a. How is AI affecting medicine at present?
- ▶ **3b. How will AI affect medicine in the next decade?**
- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

# NEXT DECADE (MY OPINION)

- ONCE THE **NEURO-SYMBOLIC GAP IS SOLVED**, AI SYSTEMS SHOULD BE ABLE TO DO THE WORK ALMOST ANY HEALTHCARE WORKER CAN DO
- HUMANS PROVIDE **OVERSIGHT** (FOR A WHILE....) OF AI HEALTH SYSTEMS

# NEXT DECADE (MY OPINION)

HUMANS PROVIDE EMPATHIC &  
**EXISTENTIAL LIAISON** TO AI HEALTH  
SYSTEMS

→ THUS KEY FOR PSYCHOTHERAPY

Even if technology is  
great, will this work?

# LEARNING OBJECTIVES

- ▶ 1. Real understanding of what AI is:
- ▶ 1a. Deep Learning and Reinforcement Learning
- ▶ 1b. Field of Artificial Intelligence (AI)
- ▶ 1c. Neuro-Symbolic Gap
- ▶ 2. How will AI in next decade (or two) affect my patients' lives?
- ▶ 3. How will AI affect my practice of medicine including psychotherapy?
- ▶ 3a. How is AI affecting medicine at present?
- ▶ 3b. How will AI affect medicine in the next decade?
- ▶ 4. How will AI affect the future of mankind?
- ▶ 5. Discussion

# DEEP LEARNING ALL AROUND US NOW: LONDON POLICE SURVEILLANCE CAMERAS WITH FACIAL RECOGNITION

## PSYCHOLOGY OF CONSTANT SURVEILLANCE??

# Bostrom – SuperIntelligence

*Could an AI Paperclip  
Maximizer machine turn  
the earth into paperclips?*

184

March 2020

# Kurzweil – AI Exceeding Human Intelligence and Merging with Humans

# SINGER'S 2009 BOOK – WIRED FOR WAR

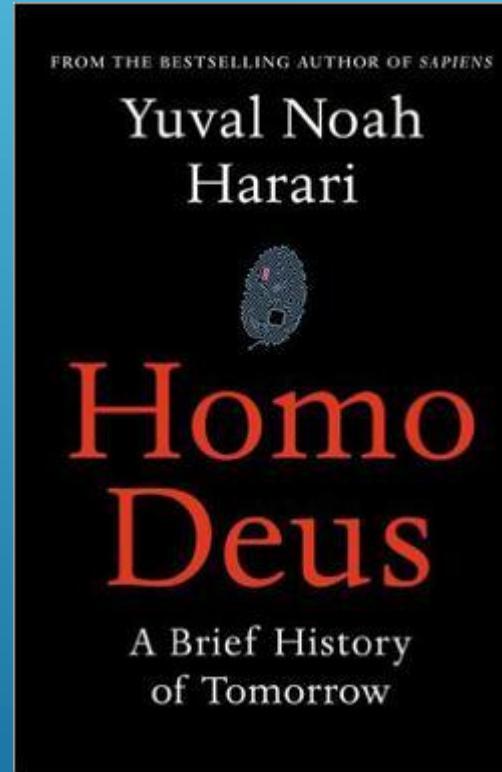

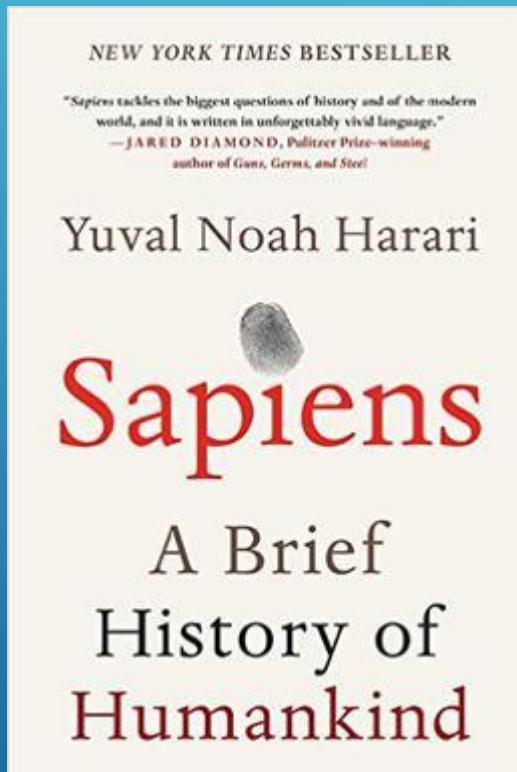

# 2017 ASILOMAR AI PRINCIPLES

- #1- The goal of AI research should be to create not undirected intelligence, but **beneficial intelligence**.
- #6- AI systems should be **safe and secure.. verifiably so..**
- #23- **Superintelligence** should only be developed.. for the **benefit of all humanity** rather than one state.

188

- Continued technological powers.
- We lose meaning in our lives
- Replacement of *H sapiens* with *H deus*

## RIGHT NOW

- AI (= DEEP LEARNING) IS A PHENOMENAL COMPUTER SCIENCE TECHNIQUE
- LIKELY TO **IMPROVE OUR LIVES**
- TERMINATOR NOT POSSIBLE

## FUTURE

- THAT'S ANOTHER STORY
- **AI SAFETY CONCERNS**

190

March 2020

# OK.... WE'VE MADE IT....

# LEARNING OBJECTIVES
